*The Armed Forces Covenant in action?* Great Britain: Parliament: House of Commons: Defence Committee, 2013-07-18 A series of Ofsted inspections on Army Apprenticeships conducted in 2013 rated the overall effectiveness as good This was an improvement over the last inspection in 2009 rated as satisfactory now called requires improvement Some 28 per cent of Army recruits were less than 18 years of age Further information is needed on why the Army is so dependent on recruiting personnel under the age of 18 years compared to the other two Services and whether steps are being taken to reduce this dependency Of those recruited in 2012 3 5 per cent of the Army were rated at entry level 2 for literacy that of a 7 to 8 year old and 39 per cent had a literacy level of an eleven year old If as the MoD states it has to recruit personnel at whatever level of attainment is available then it should boost remedial action when recruitment entry standards are particularly low In light of changes brought about by Future Force 2020 it may be that recruiting personnel with higher levels of attainment would better meet the future needs of the Armed Forces Whilst the Committee recognises that some recruits may not be eager to take further academic exams the MoD should encourage more recruits to undertake English and Maths GCSEs which would stand them in good stead for future employment The MoD has carried out some useful pilot projects with paramedic training and should identify more potential projects to ensure that vital skills paid for by the MoD are not lost to the country

Improving a Country's Education Nuno Crato, 2020-11-23 This open access book compares and contrasts the results of international student assessments in ten countries The OECD s Programme for International Student Assessment PISA released the results of its 2018 assessment in December 2019 This book reflects the debates that typically follow the release of these results and focuses on the causes of differences between countries Such causes include continuous decline in one country improvement combined with increasing internal inequalities in another country or rapid improvement in spite of an outdated curriculum in yet another In addition the book discusses a number of general questions Is knowledge outdated Are computers taking over and replacing teachers Are schools killing creativity Are we adequately preparing the next generation Are schools failing to educate our kids The book starts out with a summary of PISA s evolution and PISA results and an explanation of the major factors that play a role in changes in countries results The next ten chapters are devoted to

ten specific countries offering a summary of data and an explanation of the major drives for changes in education results for each one. Each chapter includes a short description of the country's educational system as well as the impact of PISA and other ILSA studies on the country's educational policies. The chapters also include a timeline of policy measures and main hallmarks of the country's educational evolution, discussing the impact of these measures on its PISA results. A final reference chapter explains what PISA is, what it measures, and how. While highlighting the 2018 results, the book also takes into consideration previous results as well as long-term initiatives. This book gathers the contribution of well-known and respected experts in the field. Specialists such as Eric Hanushek for the US, Tim Oates for England, Montse Gomendio for Spain, Gunda Tire for Estonia, and all other contributors draw on their vast experience and statistical analysis expertise to draw a set of rich country lessons and recommendations that are invaluable for all of those who care about improving a country's education system.

**Understanding and Applying Assessment in Education** Damian Murchan, Gerry Shiel, 2024-04-09

All teachers are responsible for assessing the children they teach, and the outcomes of any assessment are important for individual learners, schools, and wider education systems. Designed as a pragmatic guide for new teachers and those training to teach, this book is your one-stop shop for understanding assessment in schools. It covers formative and summative approaches used across primary and secondary education, supporting a balanced overview with policy examples drawn from the UK, Ireland, and wider international contexts. This updated second edition reflects recent trends in assessment and includes more balanced coverage across primary and secondary age phases, with a broader range of examples across curriculum subject areas, a new chapter on the potential of digital assessment for both formative and summative purposes, the impact of the COVID-19 pandemic on assessment in general, and examinations in particular. Damian Murchan is Associate Professor in the School of Education at Trinity College Dublin. Gerry Shiel is a Research Fellow at the Educational Research Centre Dublin, Ireland.

*Unlocking Speaking and Listening* Deborah Jones, Pamela Hodson, 2017-11-09

Spoken language is a key component of the primary national curriculum and is fundamental to children's language development and learning. The need for teachers to develop talk in its own right and also use talk as a means of learning is central to effective primary practice. In the past, Initial Teacher Education and CPD have focused on literacy, reading, and writing to the detriment of speaking and listening. However, research strongly supports talk as fundamental to learning and teaching. It has also been identified as an area where teachers feel less confident. This fully updated third edition of *Unlocking Speaking and Listening* tackles key issues surrounding spoken language with rigour, depth, and a strong focus on research, providing education professionals with clear practical strategies for engaging in purposeful talk while also celebrating children's implicit understanding and love of the spoken word. Drawing on recent classroom research, *Unlocking Speaking and Listening* considers what children and teachers need to know in order to develop as effective speakers and listeners. The book addresses Planning and assessing talk, Drama and storytelling, Working with EAL children, Developing talk in Science, and

Mathematics Special educational needs Using technology to enhance children s communication Two new chapters on the importance of talk to underpin children s reading development are also included With contributions from experts in the field this vital and fully updated resource will help both trainee and practising primary teachers understand and promote the importance of speaking and listening as an effective tool for learning across the primary curriculum *Commonwealth Universities Yearbook* T.
