*Human Development Report 2004* United Nations Development Programme, 2004. This is the 15th report prepared by a team of independent experts which explores major development issues of global concern. The 2004 report focuses on issues of cultural liberty and concludes that countries must actively devise multicultural policies to prevent cultural discrimination whether on grounds of religion, ethnicity or language since the expansion of cultural freedoms is at the core of human development. Rather than presenting a threat to state unity, the report argues that diversity is the only sustainable option to promote stability and democracy within and across societies. Issues discussed include confronting extremist movements for cultural domination, myths surrounding cultural liberty and development, the impact of globalisation on cultural choice, social exclusion, human rights and participation. It also includes data tables for the Human Development Index (HDI) which measures key social and economic indicators for rich and poor countries including life expectancy, health and sanitation, employment, rights, gender equality, education and income per person. **Daily Graphic** Ransford

Tetteh, 2010-09-29 Schooling in Sub-Saharan Africa Clive Harber, 2017-07-12. This book is a comprehensive text for those interested in formal education in sub-Saharan Africa. It provides a thought-provoking overview of the key educational ideas, themes and issues facing schooling in Africa today by drawing on a wide literature to examine evidence concerning both educational policy and the working realities of primary and secondary schools in Africa. Based on the author's forty years of experience in researching and publishing on education in Africa, it takes a balanced but critical approach to analysing education in Africa and discusses both positive and negative patterns across the region as well as identifying differences between and within countries. The book examines major questions of educational provision, structure, content and process but does so in a way that raises challenging questions about gender inequality, violence, authoritarianism and democracy in education as well as the fundamental question of whether education is achieving its desired outcomes. It will be of great interest to students and researchers working in the fields of comparative and international education, education and international development, African education, African studies and development studies. *The Times Index*, 2006.
