

Removing the bobbin case

Lift or remove the extension table, open the shuttle door. There is a small recess on the free arm to facilitate the opening of the shuttle door.

Grasp the bobbin case with the thumb and index finger so that the latch is depressed and draw out the bobbin case. The bobbin will remain in the case as long as the latch is depressed. When you release the catch, the bobbin will be released.

Bobbin winding

Take an empty bobbin from the accessory box. On one side of the bobbin there is a hole. Turn the bobbin, with the hole outwards, and slide it onto the bobbin spindle which is located on the right side of the machine. Set the stop-right push-button at the intermediate position.

Threading for bobbin winding can be done as shown in the upper picture, but if you want to use the same reel as the upper thread, and don't want to thread the machine again, you follow the fig. below. When using a transparent presser foot, the thread has to go from the thread guide on the needle clamp to the guide at the back of the machine, otherwise the presser foot sole might be damaged. Be careful not to pull the thread direct from the eye of the needle, as this could cause the needle to bend.

Place the thread over the bobbin. Start from above and wind the thread a few times around the bobbin. Hold the end of the thread while you press down the foot control. Release the thread end as soon as winding starts. Stop winding before the bobbin is completely filled—about 1 mm (1/32") from the rim (outer edge).
