High Leverage Practices for Intensive Interventions James McLeskey, Lawrence Maheady, Bonnie Billingsley, Mary T. Brownell, Timothy J. Lewis, Sheila Alber-Morgan, 2023-06-01 High Leverage Practices for Intensive Interventions provides special education teachers with descriptions and practical instructions on how to use High Leverage Practices HLPs to improve student outcomes Since many students with disabilities spend their school day in inclusive general education classrooms these intensive interventions are

often delivered in separate or tier 3 settings to meet the students individualized needs Each chapter focuses on a specific High Leverage Practice with explanations of its purpose and essential components accompanied by examples for use with small groups of students or the individual student This accessible and comprehensive guide is key for pre service teachers in special education programs or those who provide intensive interventions with students International Conference of the Learning Sciences Barry J. Fishman, Samuel F. O'Connor-Divelbiss, 2013-04-15 The field of the learning sciences is concerned with educational research from the dual perspectives of human cognition and computing technologies and the application of this research in three integrated areas Design Design of learning and teaching environments tools or media including innovative curricula multimedia artificial intelligence telecommunications technologies visualization modeling and design theories and activity structures for supporting learning and teaching Cognition Models of the structures and processes of learning and teaching by which knowledge skills and understanding are developed including the psychological foundations of the field learning in content areas professional learning and the study of learning enabled by tools or social structures Social Context The social organizational and cultural dynamics of learning and teaching across the range of formal and informal settings including schools museums homes families and professional settings Investigations in the learning sciences approach these issues from an interdisciplinary stance combining the traditional disciplines of computer science cognitive science and education This book documents the proceedings of the Fourth International Conference on the Learning Sciences ICLS 2000 which brought together experts from academia industry and education to discuss the application of theoretical and empirical knowledge from learning sciences research to practice in K 12 or higher education corporate training and learning in the home or other informal settings Learning Science Barbara Schneider, Joseph Krajcik, Jari Lavonen, 2020-02-11 An innovative internationally developed system to help advance science learning and instruction for high school students This book tells the story of a 3 6 million research project funded by the National Science Foundation aimed at increasing scientific literacy and addressing global concerns of declining science engagement Studying dozens of classrooms across the United States and Finland this international team combines large scale studies with intensive interviews from teachers and students to examine how to transform science education Written for teachers parents policymakers and researchers this book offers solutions for matching science learning and instruction with newly recommended twenty first century standards *ENC Focus* ,2000 *Partnerships with Business and the Community* ,2001 Teaching Fractions and Ratios for Understanding Susan J. Lamon, 2006-08-15 This popular text addresses the urgent need for curriculum materials that cross traditional boundaries to include many of the elements that are integrated in the teaching learning enterprise mathematics content teacher understanding student thinking teaching methods instructional activities and assessment The book pushes readers beyond the limits of their current understanding of rational numbers challenging them to refine and explain their thinking without falling back on rules and procedures they have relied on throughout their lives

Written in a conversational and easy to understand style this is not a textbook as much as it is a resource book. An underlying assumption is that facilitating teacher understanding using the same questions and activities that may be used with children is one way to help teachers build the comfort and confidence they need to begin talking to children about complex ideas. Unlike a textbook that is used to study formal theory and then discarded when it comes to putting ideas into practice the many problems and activities included to facilitate teacher learning are valuable resources for use in elementary and middle school classrooms. Changes in the second edition include even more student work incorporated in every chapter discussion of the connectivity between the topics addressed in the book and the elementary and middle school mathematics curricula, an increased emphasis on measurement expansion of some topics including number sense, percent, scale factors, similarity, and linear graphs, clarification of the characteristics of ratio and proportions and how to use these to generate discussion with children, and content related interview questions for exploring children's thinking. This book is a valuable resource for researchers and curriculum developers in mathematics education, pre-service and in-service teachers of mathematics, those involved in the mathematical and pedagogical preparation of mathematics teachers, and graduate students in mathematics education. The methods and activities it includes have been tested with students in grades 3-8 and with pre-service and in-service teachers and other adults. This text is accompanied by MORE, a supplement that is not merely an answer key but a resource that includes in-depth discussions of all the problems in the text, develops and extends discussion of the issues, teaching problems, and other considerations raised in the chapters, and contains additional problems with and without solutions that instructors may find helpful for assessment purposes.

Prioritizing Urban Children, Teachers, and Schools through Professional Development Schools Pia Lindquist Wong, Ronald David Glass, 2009-03-17 How can we better educate disadvantaged urban students? Drawing on over five years' experience in a broad partnership involving twelve urban professional development schools in five districts, a teachers union, a comprehensive public university, and several community-based organizations, the contributors to this volume describe how they worked together to help disadvantaged urban students through an innovative professional development program. By networking with educators at different levels and coordinating curriculum projects, they were able to begin overcoming rigid and ineffective mandates and curricula tied to standardized test scores and get through to their students on more meaningful and productive levels. The contributors share their successes and failures with these efforts as well as insights related to the ethical, political, and academic challenges faced by professional development schools.

The SimCalc Vision and Contributions Stephen J. Hegedus, Jeremy Roschelle, 2012-12-16 This volume provides essential guidance for transforming mathematics learning in schools through the use of innovative technology, pedagogy, and curriculum. It presents clear, rigorous evidence of the impact technology can have in improving students' learning of important yet complex mathematical concepts and goes beyond a focus on technology alone to clearly explain how teacher professional development, pedagogy, curriculum, and student participation and identity each

play an essential role in transforming mathematics classrooms with technology Further evidence of effectiveness is complemented by insightful case studies of how key factors lead to enhancing learning including the contributions of design research classroom discourse and meaningful assessment The volume organizes over 15 years of sustained research by multiple investigators in different states and countries who together developed an approach called SimCalc that radically transforms how Algebra and Calculus are taught The SimCalc program engages students around simulated motions such as races on a soccer field and builds understanding using visual representations such as graphs and familiar representations such as stories to help students to develop meaning for more abstract mathematical symbols Further the SimCalc program leverages classroom wireless networks to increase participation by all students in doing talking about and reflecting on mathematics Unlike many technology programs SimCalc research shows the benefits of balanced attention to curriculum pedagogy teacher professional development assessment and technology and has proven effectiveness results at the scale of hundreds of schools and classrooms Combining the findings of multiple investigators in one accessible volume reveals the depth and breadth of the research program and engages readers interested in Engaging students in deeply learning the important concepts in mathematics Designing innovative curriculum software and professional development Effective uses of technology to improve mathematics education Creating integrated systems of teaching that transform mathematics classrooms Scaling up new pedagogies to hundreds of schools and classrooms Conducting research that really matters for the future of mathematics learning Engaging students in deeply learning the important concepts in mathematics Designing innovative curriculum software and professional development Effective uses of technology to improve mathematics education Creating integrated systems of teaching that transform mathematics classrooms Scaling up new pedagogies to hundreds of schools and classrooms Conducting research that really matters for the future of mathematics learning
