Characters such as Katcinsky and the Brunette French girl are described with "faces of the soil" and as having soft, brown skin. The opening scenes depict Paul and his comrades already behind the Front. The reader gets a more personal feel, as they are experiencing the war directly from Paul's thoughts.

Paul and the others have to teach the very young recruits how to survive the front.

The ending of the story is more depressing and disheartening, as Paul is listing all the ways his old friends died, before he himself dies.

Paul and all his comrades (besides Tjaden) are dead by the end of the story. Kemmerich's boots are symbolic to the story and characters. Overwhelming emotions, pain, and tragedies of war are shown and deeply expressed. When on leave, Paul is terribly uncomfortable, and does not feel at home because of how ignorant his family and neighbors seem to be on war. Paul and his comrades were brought to enlistment by their schoolteacher, only to see his preaching on war is not entirely how it truly is.

Characters such as Katcinsky and the brunette French girl are shown as caucasian.

The opening scenes show Paul and his classmates enlisting and training.

Paul's death is slightly more symbolic, with him reaching for a butterfly before he is shot.

Katcinsky is the one who teaches Paul and his classmates (the young recruits) how they are to survive the front.

There is a strong emphasis on the soldiers' boots after Mueller recieves Kemmerich's.

The Teacher's Guide to Media Literacy Cyndy Scheibe, Faith Rogow, 2012 A Deeper Sense of Literacy is the first book to suggest that media literacy is both a content area and an approach to teaching that can be integrated into any subject area It combines theory and practical application in a way that addresses the most important questions related to media literacy in education today what is it why is it important how can you teach it across a wide range of curriculum areas and grade levels and does it work Rather than focusing on how to teach media literacy Scheibe and Rogow focus on actually using media literacy to teach lessons across the content areas Resources for Teaching Novels, Plays, and Literature Collections, 1999

Good Reasons for Better Arguments Jerome E. Bickenbach, Jacqueline M. Davies, 1996-09-19 This text introduces university students to the philosophical ethos of critical thinking as well as to the essential skills required to practice it The authors believe that Critical Thinking should engage students with issues of broader philosophical interest while they develop their skills in reasoning and argumentation The text is informed throughout by philosophical theory concerning argument and communication from Aristotle s recognition of the importance of evaluating argument in terms of its purpose to Habermas s developing of the concept of communicative rationality The authors treatment of the topic is also

sensitive to the importance of language and of situation in shaping arguments and to the necessity in argument of some interplay between reason and emotion Unlike many other texts in this area then Good Reasons for Better Arguments helps to explain both why argument is important and how the social role of argument plays an important part in determining what counts as a good argument If this text is distinctive in the extent to which it deals with the theory and the values of critical thinking it is also noteworthy for the thorough grounding it provides in the skills of deductive and inductive reasoning the authors present the reader with useful tools for the interpretation evaluation and construction of arguments A particular feature is the inclusion of a wide range of exercises rich with examples that illuminate the practice of argument for the student Many of the exercises are self testing with answers provided at the back of the text others are appropriate for in class discussion and assignments Challenging yet accessible Good Reasons for Better Arguments brings a fresh perspective to an essential subject
