**Traffic Safety** ,2003      Statement of Disbursements of the House as Compiled by the Chief Administrative Officer from ... United States. Congress. House, Covers receipts and expenditures of appropriations and other funds      House Document No. 83 ,1953      *Statement of Disbursements of the House* ,2006      *Library of Congress Subject Headings* Library of Congress,2006      American Light Trucks and Utility Vehicles, 1967-1989 J. "Kelly" Flory, Jr.,2019-10-31 The truck s role in American society changed dramatically from the 1960s through the 1980s with the rise of off roaders the van craze of the 1970s and minivan revolution of the 1980s the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes This comprehensive reference book follows the form of the author s popular volumes on American cars For each year it provides an industry overview and for each manufacturer an update on new models and other news followed by a wealth of data available powertrains popular options paint colors and more Finally each truck is detailed fully with specifications and measurements prices production figures standard equipment and more      **The National Highway Traffic Safety Administration's Rating System for Rollover Resistance** National Research Council (U.S.). Committee for the Study of a Motor Vehicle Rollover Rating System,2002 Explains that the static stability factor is an indicator of a vehicle s propensity to roll over and that US government ratings for vehicles do not reflect differences in rollover resistance This report states that the 5 star system should allow discrimination among vehicles and incorporate results from road tests that measure vehicle control      **Atlanta** ,2004-12 Atlanta magazine s editorial mission is to engage our community through provocative writing authoritative reporting and superlative design that illuminate the people the issues the trends and the events that define our city The magazine informs challenges and entertains our readers each month while helping them make intelligent choices not only about what they do and where they go but what they think about matters of importance to the community and the region Atlanta magazine s editorial mission is to engage our community through provocative writing authoritative reporting and superlative design that illuminate the people the issues the trends and the events that define our city The magazine informs challenges and entertains our readers each month while helping them make intelligent choices not only about what they do and where they go but what they think about matters of importance to the community and the region      *The Consumer Response to Gasoline Price Changes* Kenneth Thomas Gillingham,2011 When gasoline prices rise people notice the news is filled with reports of pinched household budgets and politicians feeling pressure to do something to ameliorate the burden Yet raising the gasoline tax to internalize externalities is widely considered by economists to be among the most economic efficiency improving policies we could implement in the

transportation sector This dissertation brings new evidence to bear on quantifying the responsiveness to changing gasoline prices both on the intensive margin i.e. how much to drive and the extensive margin i.e. what vehicles to buy I assemble a unique and extremely rich vehicle level dataset that includes all new vehicle registrations in California 2001 to 2009 and all of the mandatory smog check program odometer readings for 2002 to 2009 The full dataset exceeds 49 million observations Using this dataset I quantify the responsiveness to gasoline price changes on both margins as well as the heterogeneity in the responsiveness I develop a novel structural model of vehicle choice and subsequent utilization where consumer decisions are modeled in a dynamic setting that explicitly accounts for selection on unobserved driving preference at both the time of purchase and the time of driving This utility consistent model allows for the analysis of the welfare implications to consumers and government of a variety of different policies including gasoline taxes and feebates I find that consumers are responsive to changing gasoline prices in both vehicle choice and driving decisions with more responsiveness than in many recent studies in the literature I estimate a medium run i.e. roughly two year elasticity of fuel economy with respect to the price of gasoline for new vehicles around 0.1 for California a response that varies by whether the vehicle manufacturer faces a tightly binding fuel economy standard I estimate a medium run elasticity of driving with respect to the price of gasoline around 0.15 for new personal vehicles in the first six years Older vehicles are driven much less but tend to be more responsive with an elasticity of roughly 0.3 I find that the vehicle level responsiveness in driving to gasoline price changes varies by vehicle class income geographic and demographic groups I also find that not including controls for economic conditions and not accounting for selection into different types of new vehicles based on unobserved driving preference tend to bias the elasticity of driving away from zero implying a greater responsiveness than the true responsiveness This is an important methodological point for much of the literature estimating similar elasticities ignores these two issues These results have significant policy implications for policies to reduce gasoline consumption and greenhouse gas emissions from transportation The relatively inelastic estimated responsiveness on both margins suggests that a gasoline tax policy may not lead to dramatic reductions in carbon dioxide emissions but is a relatively non distortionary policy instrument to raise revenue When the externalities of driving are considered an increased gasoline tax may not only be relatively non distortionary but even economic efficiency improving However I find that the welfare changes from an increased gasoline tax vary significantly across counties in California an important consideration for the political feasibility of the policy Finally I find suggestive evidence that the rebound effect of a policy that works only on the extensive margin such as a feebate or CAFE standards may be closer to zero than the elasticity of driving with respect to the price of gasoline This suggestive finding is particularly important for the analysis of the welfare effects of any policy that focuses entirely on the extensive margin
