Incentivising Angels Stephen Barkoczy, Tamara Wilkinson, 2019-04-24 This book examines tax incentives for investors in start up companies through a critical analysis of Australia's early stage investors ESI program and a comparison of that program with the United Kingdom's Seed Enterprise Investment Scheme SEIS upon which it is loosely modelled. It discusses the importance of innovation and the special role that venture capital plays in supporting start ups and explains the policy rationale for introducing the ESI program as well as dissecting its technical requirements in detail. Special attention is devoted to the program's early stage and innovation requirements which are crucial for determining whether a start up qualifies for the tax incentives. The book is the first in depth scholarly legal analysis of the ESI program and the first occasion it has been compared and contrasted with a foreign program. The comparative discussion of the ESI program with the SEIS program enables the authors to make suggestions for reforms to the ESI program so that it can better achieve its policy objectives. The fact that the book includes reform suggestions makes it particularly interesting for policy makers. It is also of broad relevance to legal and finance scholars and students as well as entrepreneurs, angels, venture capitalists and their advisors.

Accelerators Mike Wright, 2018 Accelerators are a rapidly growing new form of organization that aim to stimulate entrepreneurship through intensive limited period educational programs including mentoring and networking for the cohort of start up participants selected for each program to improve their ability to attract investment at the end of the program. Drawing on novel evidence from across the world this is the first book to provide rigorous analysis of the nature and effectiveness of accelerators that will be invaluable for researchers, policymakers and entrepreneurs.
