Ventures Simon Parker, 2006-12-26 about nascent entrepreneurship distilled from recent research Wagner first summarises evidence about the incidence of nascent entrepreneurship before surveying the start up activities of nascent entrepreneurs. He then goes on to provide a birds eye view of the characteristics of nascent entrepreneurs the factors associated with becoming a nascent entrepreneur and the outcomes of nascent entrepreneurs in terms of whether they start quit or continue preparing for eventual business entry. Wagner's chapter provides a wealth of information about nascent entrepreneurship summarising key findings from a large and growing and diverse literature which looks set to continue growing rapidly in the years ahead. In Chapter 3 Shaker Zahra reviews the literature on new venture strategy and its implications for organizational survival financial performance and growth. Zahra discusses competitive cooperative and political strategies and highlights the importance of synchronizing these strategies. A particular strength of this chapter is its ability to uncover similarities and unifying themes in apparently divergent views. In this way the chapter succeeds in resolving some apparent contradictions by putting the different perspectives into a complementary context and identifying areas where convergence appears to be within reach. Zahra goes on to highlight the contributions of the different strategic approaches as well as their shortcomings. He concludes by identifying several implications for future research.

Nurturing Science-based Ventures Ralf W. Seifert, Benoît F. Leleux, Christopher

L. Tucci, 2008-01-25 Few would deny that small entrepreneurial firms play an important economic and social role. Not only do they generate a significant number of jobs but they also contribute a large proportion of gross national product (GNP). Not all small firms qualify as entrepreneurial entities, however. While small refers mostly to size, entrepreneurial refers to growth and a value creation orientation. The vast majority of small firms have no growth aspirations nor do they have the means and skills to grow. As such, they may still provide employment and local value but would not embrace the high potential aspirations of entrepreneurial ventures. This book clearly addresses those entrepreneurs who are interested in leading high growth potential companies.

Table 1: Growth Typology of Small Firms

Type of venture	Desired sales range	Future employees	Lifestyle
0 to 1 million	0 to 4	Smaller	high potential
1 million to 20 million	5 to 50	High potential	over 20 million
Over 20 million	Over 50	High	innovation

technology based startups assume a very special role in high growth entrepreneurship. Although these startups constitute a comparatively low number of small businesses, they produce proportionately far more jobs than their low and medium innovation counterparts. The aim of achieving rapid growth is typically referred to as high expectation entrepreneurship. An area of major concern to us is a fact revealed in the latest GEM report: The rate of European high expectation entrepreneurial activity is among the lowest in the world.

Research Handbook on Accounting and Information Systems Julia A. Smith, 2024-02-12 The role of the accountant is changing as developments in technology alter the ways in which information is prepared and analysed. This Research Handbook addresses the use of both financial and non financial information for planning, decision making, and control in organisations. Written by experts in the field, the book uses comprehensive literature reviews, empirical fieldwork, and theoretical developments to provide an overview of research in this important area.

Entrepreneurship for Engineers Kenji Uchino, 2017-09-20 Entrepreneurs have led economies out of downturns in the last 100 years, and evidence points to this trend continuing into the future. In fact, regardless of country or economic conditions, entrepreneurial enterprises are on the rise. High tech start-ups, where innovation, dedication, collaboration, and pure genius align into a successful enterprise.
