The service sector in most advanced economies accounts for up to seventy percent of employment and GDP and given its growing importance has received much research attention over the last two decades However not very much attention has been paid to the relationship between this sector and both its territorial impact and regional effects The main objective of this book is to offer a comprehensive approach to these aspects focusing particularly on the location factors of service industries and the importance of some specific services such as business services and knowledge and information services The contributions have been prepared by well known experts in the field from a wide number of countries The focus of all contributions is not only on theoretical aspects but also provides empirical analyses on specific countries and topics such as the geographical concentration globalization impacts foreign direct investments and innovation **Climate Variability and**

Change in the Rift Valley and Blue Nile Basin, Ethiopia Abate Mekuriaw Bizuneh,2013 This study deals with three interrelated problems First it pursues the quest for local knowledge to understand climate variability and change at local levels Due to controversies uncertainties skepticism and embedded economic and political interests in the climate change discourse effective world collective action is more likely to delay for quite some time to come Moreover as climate change discourse remains very weak at engaging local knowledge policies that emanate from the discourse might be less responsive to local climate problems both in terms of policy ingredients and time frame So having highlighting the paramount importance of local knowledge this study documents and critically analyzes this knowledge system among subsistence farmers in Ethiopia Secondly it analyzes the economic impacts of climate variability and change and adaptation through quantitative methods with a special focus on crop production Finally it analyzes the factors that influence adaptive behavior In so doing it challenges the traditional approach of adaptation research and brings in a conceptual framework borrowed from psychosocial theory and empirically tests the approach in explaining adaptive behavior of farmers *Governance of*

Hospitals in Central and Eastern Europe Przemyslaw Marcin Sowa,2015-10-28 This book presents a novel view of healthcare system transition in post communist countries It is the first region wide comparative study of hospital governance in Eastern Europe Comprehensive new material shows the evolution and significance of governance complementing recent publications on the topic from industrialised countries Throughout the book governance is described and substantiated as a major component that together with provider payment mechanisms defines the hospital sector s operations This view subscribes to the economists growing appreciation of extra financial aspects in the discussion of incentives and regulation of healthcare markets In particular the book explains how governance arrangements may affect the outcomes of healthcare financing reforms and should thus be seen as a critical determinant of their success or failure This new model of thinking about

healthcare system transition emerges from an analysis of 22 countries over the course of two decades While the primary focus of the study is on developing the hospital sector an extensive background chapter provides a standalone introduction to the dynamically changing landscape of healthcare in Eastern Europe and an overview of the various problems and challenges the region is facing Practitioners policy makers academics and students interested in Eastern European healthcare systems their origins current status and ways forward will appreciate the book s reflections on the problem complexity the clarity of its concepts and its accessible style of presentation

Limitations of contract farming as a pro-poor strategy: The case of maize outgrower schemes in upper West Ghana Ragasa, Catherine, Lambrecht, Isabel, Kufoalor, Doreen S., 2017-03-30 The focus in this paper is on two relatively large maize based contract farming CF schemes with fixed input packages Masara and Akate and a number of smaller and more flexible CF schemes in a remote region in Ghana Upper West Results show that these schemes led to improved technology adoption and yield increases In addition a subset of maize farmers with high yield improvements due to CF participation had high gross margins However on average yields were not high enough to compensate for higher input requirements and cost of capital On average households harvest 29 30 bags 100 kg each or 2 9 3 0 metric tons of maize per hectare and the required repayment for fertilizer seed herbicide and materials provided under the average CF scheme is 21 25 bags 50 kg each per acre or 2 6 3 0 tons per hectare which leaves almost none for home consumption or for sale Despite higher yields the costs to produce 1 ton of maize under CF schemes remain high on average higher than on maize farms without CF schemes more than twice that of several countries in Africa and more than seven times higher than that of major maize exporting countries the United States Brazil and Argentina Sustainability of these CF schemes will depend on from the firms perspective minimizing the costs to run and monitor them and from the farmers perspective developing and promoting much improved varieties and technologies that may lead to a jump in yields and gross margins to compensate for the high cost of credit
