Fiber optics weekly update , **Verizon Untethered** Ivan Seidenberg, 2018-05-01 The Verizon leadership team stands apart from most leadership teams today in their willingness repeatedly to put the enterprise before the individual At first blush this might look like a hopelessly old fashioned notion in the age of the selfie Yet I would argue this is a trait that future leaders and boards of directors across industries would do well to understand and embrace Seidenberg not once but twice in the service of company shareholders and employees subordinated himself and put off taking sole leadership of the company to advance the enterprise s odds of success And many others in this story exhibited the same trait to help build this industry leading enterprise They understood that the risk of not acting and thereby destroying value during a period of accelerating technological change and industry consolidation a situation faced by leadership teams around the world today was much greater than the risk of stepping in as No 2 or co CEO In my 50 years of experience it is a rare leadership team that will subordinate itself for the benefit of the industry customers and the company That principle that the company comes first the individual second is what will define successful leadership teams of the future Multiple leadership principles some new some timeless emerge from this narrative and will be of great use to the next generation of leaders across industries and around the world By taking a look at a company that successfully executed exponential transformation we can take the strategies of Verizon leaders and apply them to our own experiences Ram Charan **Digital Video Recorders** Jimmy Schaeffler, 2013-07-24 Four specific trends are driving the DVR industry consumer content choice consumer content control personalization of content libraries and the ability to transfer content from device to device and person to person Digital Video Recorders features a macro and micro views of the already established yet still burgeoning DVR industry As part of the NAB Executive Technology Briefing series this book gives you a wealth of market knowledge business models case studies and industry insights explained in a non technical fashion Digital Video Recorders discusses the impact of the technology across many different industries and platforms explains hardware software and technology of set top boxes DVR infrastructure on screen guides planning and scheduling content security and more Whether you are an executive in the broadcast telecommunications consumer electronic or advertising space you will expand your knowledge on DVR impact explore new business opportunities and get a brief overview of the technical terms needed You will also be able to accurately analyze and understand the trends projections and other data all of which will help lead to the expedited growth and development of DVR industry *FCC Record* United States. Niche Envy Joseph Turow, 2008-02-15 The price we pay for the new strategies in database marketing that closely track desirable customers offering them benefits in return for personal information We have all been to Web sites that welcome us by name offering us discounts deals or special access to content For the most part it feels good to be wanted to be valued as a customer But if we thought about it we might realize that we've paid for this special status by turning over personal information to a company's database And we might wonder whether other customers get the same deals we get or something even better We might even feel stirrings of resentment toward customers more valued than we are In *Niche Envy* Joseph Turow examines the emergence of databases as marketing tools and the implications this may have for media advertising and society If the new goal of marketing is to customize commercial announcements according to a buyer's preferences and spending history or even by race gender and political opinions what does this mean for the twentieth century tradition of equal access to product information and how does it affect civic life Turow shows that these marketing techniques are not wholly new they have roots in direct marketing and product placement widely used decades ago and recently revived and reimagined by advertisers as part of customer relationship management known popularly as CRM He traces the transformation of marketing techniques online on television and in retail stores And he describes public reaction against database marketing pop up blockers spam filters commercial skipping video recorders and other ad evasion methods Polls show that the public is nervous about giving up personal data Meanwhile companies try to persuade the most desirable customers to trust them with their information in return for benefits *Niche Envy* tracks the marketing logic that got us to this uneasy impasse
