What do you think you're doing he asked in a dangerously soft voice Obviously playing with fire that's what Caitlyn quickly dropped her hand She didn't know what had prompted her to touch Tyler but that brief contact left her fingers scorched and her heart racing Ignoring the situation isn't going to make it go away she said What's that supposed to mean His voice went softer more dangerous His hot blue eyes lasered in on her What situation She swallowed hard Anger mixed with the strong sexual vibes pulsed between them I've been here for almost a month she said Except for that first day when we had dinner together you've been avoiding me like the plague He stepped toward her his big body seemingly growing expanding with his anger Irritation Something I taught you what you needed to know to be an ag pilot didn't I Caitlyn stepped back Yes Tyler took two steps forward I didn't avoid you then did I he said between gritted teeth No Not exactly Goodness the man was tense And now he was invading her personal space How could she have thought for a moment that she'd imagined those sparks of awareness shooting between them They were brighter and more intense than fireworks on the Fourth of July But you can't deny you've been avoiding me since then can you Tyler stood directly in front of Caitlyn and stared into her eyes He was close enough to smell her fragrance feel the heat from her body Her windblown hair tumbled around her face in wild disarray His fingers itched to run themselves through the silken tangles Unable to help himself he reached out one hand and touched her soft cheek She closed her eyes and her dark lashes made feathery crescents against her creamy skin He'd been dying to touch her again To feel her warmth and vitality He rubbed his thumb across her bottom lip Back and forth Back and forth until her eyes flew open Keeping his gaze locked on hers he leisurely traced his finger down her jaw line and the curve of her neck This is why I've been avoiding you

The Guiding Star, and Other Tales. Second Edition, 1835. *Power System Dynamics and Stability* Jan Machowski, Janusz W. Bialek, Janusz Bialek, James Richard Bumby, 1997-10-20. As the demand for electrical power increases, power systems are being operated closer to their stability limits than ever before. This text focuses on explaining and analysing the dynamic performance of such systems, which is important for both system operation and planning. Placing emphasis on understanding the underlying physical principles, the book opens with an exploration of basic concepts using simple mathematical models. Building on these firm foundations, the authors proceed to more complex models and algorithms. Features include: Progressive approach from simplicity to complexity. Detailed description of slow and fast dynamics. Examination of the influence of automatic control on power system dynamics. Stability enhancement including the use of PSS and FACTS. Advanced models and algorithms for power system stability analysis. Senior undergraduate, postgraduate and research students studying power systems will appreciate the authors' accessible approach. Also for electric utility engineers, this valuable resource examines power system dynamics and stability from both a mathematical and engineering viewpoint.
