This book charts the firsthand experiences and challenges faced by Maltese early childhood educators in the implementation of a novel approach to the curriculum: the replacement of a prescriptive curricula with one co-constructed by the educator and the child. Chapters provide seven contextualised inspiring narratives of how the emergent curriculum approach was implemented, received, and reflected upon within Maltese educational settings ranging from childcare (0-3 years), kindergarten (3-5 years), and early primary (5-7 years). Packed with practical guidance along with on-the-ground commentary, this volume showcases the pedagogical and professional transformation of these educators, informing and encouraging reflection as well as inspiring others on a global scale. Challenging the established modes and traditions of pedagogical best practice, this book ultimately fills a gap in research on how educators in diverse local contexts and cultures can embrace the global concept of the emergent curriculum within their own practice and settings. Providing pedagogical and professional insights for early years educators in similar contexts internationally, the book will be of interest to researchers and early childhood educators as well as curriculum designers and policy makers interested in how the curriculum can take shape in different cultures and contexts.

**Children's Literature** Barbara Stoodt, 1996. Young Investigators Judy Harris Helm, Lilian G. Katz, Rebecca Wilson, 2023. *Young Investigators* has been expanded to guide today's teachers through the process of conducting meaningful investigations with young children. This fourth edition of the bestseller begins with a new chapter, *How Children Really Learn*, which summarizes insights from mind/brain education research showing how experiences firmly rooted in children's curiosity and interest build intellectual capacity. The book then introduces the Project Approach with step-by-step guidance for incorporating child initiation and direction into curriculum while simultaneously addressing content standards. A new focus on critical Teacher Decision Points uses fresh from-the-classroom examples to show how teachers think through project work. The emphasis on STEM experiences has been expanded to include STEAM through a new chapter, *The Role of Project Work in the Arts*. This book makes project-based learning possible with the youngest children (toddlers through 2nd grade) who are not yet proficient in reading and writing but capable of deep-focused thinking. Throughout, readers empathize with teachers' concerns, witness how they find solutions to challenges, and feel the excitement of children during project work. *Young*

Investigators is appropriate for teachers new to using the Project Approach as well as for those who already have experience Book Features Examples of projects from child care centers and preschool K 2 and special education classrooms Instructions for incorporating standards and STEAM skills into project work A variety of experiences to help children connect to the natural world Toddler projects that reflect knowledge from recent mind brain research Tools for integrating required curriculum goals and for assessing achievement A Teacher Project Planning Journal that leads teachers through the major decision points of project work Full color photographs of children engaged with projects A study guide for pre and inservice teachers available at [www.tcpres.com](http://www.tcpres.com)
