AWESOME!!!!!!

highly successful line of digital satellite receivers. Based on its predecessor models, the ULTRA has the same modern design and sleek styling as its siblings—the 2000, Platinum and Xtreme. Closely resembling the Xtreme, the ULTRA's dull black case accented with a modernistic contrasting silver sideways "S" across the front panel maintains continuity of the model line appearance.

The unit arrived complete with everything a User needs to get up and running: Owner's Manual; ULTRA; Remote + the usual batteries; DiSeqC switch; RCA patch cord (3-jack).

The Front Panel also maintains the prior model's layout with the POWER, CHANNEL and VOLUME front panel switches being the same as we are used to seeing on the predecessor models. The center of the Front Panel contains the standard card slot; this is a working card slot with a standard built-in card reader included -- the same as the 2000, Platinum, Xtreme and PVR7000 models. The right side has a door which conceals the USB 2.0 compatible port. This port enables one to provide chip programming via a USB flash drive instead of requiring disconnection from cables and removing to your computer to update. Additionally, it's reported the USB port can display pictures and play MP3 files on your TV; I don't have a USB drive to test this function.

Prior ViewSat Owner's will feel right at home with the look and feel of the jacks on the rear panel. The POWER switch retains the traditional horizontal position on the top right rear; there is a holographic label in the lower right corner to aid potential future Owners in insuring they are purchasing a genuine ViewSat product. Component out and the standard RCA video/audio outputs are included. In the upper left is the sat cable IN and below is the loop output jack. Other standard features include the Serial Port, S-Video output and optical out connections. Just right of center is the IN from either an OTA antenna or Cable TV input. Below that jack is your TV Out jack.
