## **Night Elie Wiesel Dehumanization:**

*How Dehumanization Leads to Murder and Genocide* Stewart Gabel, 2023-11-14 This book discusses psychological aspects of dehumanization and of the human tendency to dominate control and potentially murder those considered less than or other by the dominant group It explores how increasingly severe dehumanization resulted in the genocide of six million Jews in the second World War Psychological and behavioral strategies Nazi aggressors and ordinary citizens used to mislead themselves during this process are described Understanding the sequence of events from dehumanization to murder has implications for the apparent tendency of human beings to harm and potentially kill those who appear different or who are made into the other Efforts to prevent genocide should actively challenge dehumanization of weaker populations whenever possible even when dehumanization appears mild insignificant or innocuous Dehumanization in the Global Migration

Crisis Adrienne de Ruiter, 2024 What can we learn about dehumanisation from the global migration crisis In reporting on the hardships that refugees asylum seekers and other migrants face scholars journalists commentators and displaced persons themselves have frequently described their mistreatment using the term dehumanisation Yet while this notion is commonly used or alluded to it is rarely defined or conceptualised This is surprising since its meaning is far from clear Does dehumanisation concern conditions of severe destitution in refugee camps which do not allow for minimally decent living standards Should we think of political games in which displaced people are perceived portrayed and treated as undesirable burdens or bargaining chips Or is it about the ways in which forced migrants may come to feel alienated from their own humanity This book examines what dehumanisation entails through a critical study of the various forms of social and moral exclusion to which people are exposed in the global migration crisis It presents a philosophical account of dehumanisation that is empirically grounded in both the lived experiences of forced migrants and prevailing accounts of their treatment The central argument is that dehumanisation consists in a distinct form of moral exclusion that is characterised by neglect of or contempt for the moral status of human beings which expresses itself in blindness for the significance of the human subjectivity of victims as a moral factor that should be taken into consideration **A Study Guide (New Edition) for Elie**
