

Third European Report on S&T Indicators, 2003

European Commission Ranking

By The European Commission

The European Commission also weighed in on the issue, when it compiled a list of the 22 European universities which have the highest scientific impact (measured in terms of the impact factor of their scientific output). The list is available at: http://ftp.cordis.europa.eu/pub/indicators/docs/2nd_report_snapshots.pdf (see page 2). This ranking was compiled as part of the Third European Report on Science & Technology Indicators, prepared by the Directorate General for Science and Research of the European Commission in 2003 (updated 2004).

the rest of the world are provided in the full report. The report first identifies the top university in each country, in terms of **three criteria: number of publications, citations, and impact factor**. Second, a ranking is provided of the top 22 European universities in terms of citation impact factor of their scientific publications. UCI is ranked first in terms of the number of publications and number of citations, but only 12th in terms of publication impact. In terms of citation impact (the criterion considered for the pan-European ranking), Cambridge came first and Oxford second, while smaller technical universities, such as TU Eindhoven (Netherlands) and TU Munich (Germany) are ranked third. The report does not provide a direct comparison between European and US/world universities - although it does compute a scientific impact

1. MEMBER STATE PERSPECTIVES: A SNAPSHOT OF RESULTS

Selecting the top national institution at EU Member State level (with the exception of Luxembourg), from the perspective of number of publications, number of citations, and citation impact score, one can discern interesting results. The leading universities of each country are then ranked against each other based on performance in more than 20 disciplines, ranging from clinical medicine to electrical engineering. We can see that University College London comes out on top in both publications (the number of scientific publications produced by the university) and citations (the number of times those scientific publications are cited by other researchers), with Cambridge leading the way in terms of **overall university impact scores**. This overall university impact score gives an indication of whether a university's scientific publications in leading academic journals are cited more often (or not) than publications in those journals are cited on average.

The top performers by EU Member State					
Top performers in terms of publications		Top performers in terms of citations		Top performers in terms of impact	
Univ. London	85182	Univ. London	550278	Univ. Cambridge	1.55
Univ. Paris 6	22154	Karolinska Inst.	116900	Eindhoven Univ. Techno.	1.40
Univ. Milan	16972	Univ. Paris 6	100372	Tech. Univ. Munich	1.40
Univ. Lund	16381	Leiden Univ.	86682	Univ. Strasbourg I	1.32
Univ. Munich	16208	Univ. Munich	83477	Univ. Helsinki	1.29
Univ. Utrecht	14942	Univ. Milan	82963	Univ. Cath. Leuven	1.24

Third European Report On S T Indicators 2003

Benoît Godin

Third European Report On S T Indicators 2003:

Third European Report on Science & Technology Indicators, 2003 European Commission. Community Research and Development Information Service, 2003 *Handbook of Quantitative Science and Technology Research* Henk F. Moed, Wolfgang Glänzel, Ulrich Schmoch, 2006-02-23 This handbook offers a state of the art overview of quantitative science and technology research It focuses on the development and application of indicators derived from data on scientific or scholarly publications and patents It comprises 34 chapters written by leading specialists in the various sub domains These chapters deal with theoretical and methodological issues illustrate applications and highlight their policy context and relevance Authors present a survey of the research topics they address and show their most recent achievements The 34 chapters are arranged into 5 parts Disciplinary Approaches General Methodology The Science System The Technology System and The Science Technology Interface The Editor s Introduction provides a further specification of the handbook s scope and of the main topics addressed in its chapters This handbook aims at four distinct groups of readers practitioners in the field of science and technology studies research students in this field scientists scholars and technicians who are interested in a systematic thorough analysis of their activities policy makers and administrators who wish to be informed about the potentialities and limitations of the various approaches and about their results *Measurement and Statistics on Science and Technology* Benoît Godin, 2004-08-02 How do we objectively measure scientific activities What proportion of economic activities should a society devote to research and development How can public sector and private sector research best be directed to achieve social goals Governments and researchers from industrial countries have been measuring science and technology for more than eighty years This book provides the first comprehensive account of the attempts to measure science and technology activities in Western countries and the successes and shortcomings of statistical systems Godin guides readers through the historical moments that led to the development of statistics on science and technology and also examines the socio political dynamics behind social measurement This enlightening account will be of interest to students and academics investigating science measurement as well as policy makers working in this burgeoning field **Medical Technologies in Neurosurgery** Christopher Nimsky, Rudolf Fahlbusch, 2007-12-03 This Acta Neurochirurgica supplement distills the accomplishments of the Joint Convention of the Academia Eurasiana Neurochirurgica and the German Academy of Neurosurgery held in Bamberg Germany from Sept 1-3 2005 The main focus is Medical Technologies for Neurosurgery including imaging image processing robotics workflow analysis and ethics Coverage extends from an overview of medical technologies to robotic assisted systems in neurosurgical operating rooms to intraoperative MRI **Rethinking Innovation** Ram Subramanian, Martin Rahe, Vishnuprasad Nagadevara, C. Jayachandran, 2016-03-17 Innovation manifests itself as a key driver of improved productivity and sustainable growth in today s global economic landscape This book brings together perspectives and case studies from across the world discusses frameworks and actual conditions required for innovation and

examines a variety of themes such as technology innovation research development team and human resource management product and process creativity and entrepreneurship development to augment strategic and competitive advantage It will prove essential to those in business and management entrepreneurship economics and development studies particularly those interested in innovation strategic planning and business leadership *Public Management as Corporate Social Responsibility* Massimiliano Di Bitetto, Athanasios Chymis, Paolo D'Anselmi, 2014-11-05 This collection of case studies in public management bridges the gap between mainstream CSR confined to the for profit corporations and the vast bodies of workers and organizations that make up government and its public administration The variety and discretion of managerial endeavours in public management calls for accountability and responsibility of government beyond current legal instruments The book argues that CSR must be brought to bear with government In government in fact knowledge management is not a linear process but the result of working with passion of the parts implying discretionary behaviour and creativity which in turn imply choice and responsibility Cases ranging from the USA to Central America New Zealand and Europe all confirm the complex nature of public management entailing partnership synergy for disaster recovery the intertwined link between management and new technology and mindfulness at individual level The cases are set in a framework by theoretical essays on bureaucratic behaviour and unknown stakeholders Progress in Industrial Mathematics at ECMI 2004 Alessandro Di Bucchianico, Robert M.M. Mattheij, Marc Adriaan Peletier, 2006-01-09 ECMI has a brand name in Industrial Mathematics and organises successful biannual conferences This time the conference on Industrial Mathematics held in Eindhoven in June 2004 Mathematics focused on Aerospace Electronic Industry Chemical Technology Life Sciences Materials Geophysics Financial Mathematics and Water flow The majority of the invited talks on these topics can be found in these proceedings Apart from these lectures a large number of contributed papers and minisymposium papers are included here They give an interesting and impressive overview of the important place mathematics has achieved in solving all kinds of problems met in industry and commerce in particular Creating the European Area of Higher Education Voldemar Tomusk, 2007-11-07 Since 1999 European higher education has been engaged in the most radical reform of its 900 years of history This volume brings together a group of higher education researchers across Europe and looks into the implementation of the Bologna Process in the countries often attributed a peripheral status In addition to cultural and political issues the volume pays particular attention to the role of students as well as the changing position of the intellectuals under its impact **The Symbolic Species Evolved** Theresa Schilhab, Frederik Stjernfelt, Terrence Deacon, 2012-03-26 This anthology is a compilation of the best contributions from Symbolic Species Conferences I II which took place in 2006 2007 In 1997 the American anthropologist Terrence Deacon published *The Symbolic Species The Coevolution of Language and the Brain* The book is widely considered a seminal work in the subject of evolutionary cognition However Deacon's book was the first step further steps have had to be taken The proposed anthology is such an important associate The contributions are written by a

wide variety of scholars each with a unique view on evolutionary cognition and the questions raised by Terrence Deacon
 emergence in evolution the origin of language the semiotic missing link Peirce's semiotics in evolution and biology
 biosemiotics evolutionary cognition Baldwinian evolution the neuroscience of linguistic capacities as well as phylogeny of the
 homo species primatology embodied cognition and knowledge types **Competitiveness and Growth in Europe** Susanne
 Mundschenk, Michael H. Stierle, Ulrike Stierle-von Schötz, Julia Traistaru-Siedschlag, 2006-03-29 It will be of particular
 interest to researchers and policy makers working in the fields of competitiveness and growth in the context of economic and
 monetary integration as well as to academics of European studies in general **BOOK JACKET** *Dental Computing and*
Applications: Advanced Techniques for Clinical Dentistry Daskalaki, Andriani, 2009-04-30 This book gives insight into
 technological advances for dental practice research and education for general dental clinician the researcher and the
 computer scientist Provided by publisher **Transforming European Militaries** Gordon Adams, Guy Ben-Ari, 2006-09-27 A
 unique look at European Network Enabled Capabilities NEC and their implications for transatlantic co operation in future
 operations Gordon Adams and Guy Ben Ari identify the key requirements for improvement of Europe's abilities as an
 international actor They focus on national and collaborative as well as existing and planned networks They clearly show the
 reader how with the removal of the risks of Soviet invasion European defence planners must now modify their strategies and
 capabilities to address new threats both at home and overseas They also show why future operations within international
 coalitions will require network based capabilities that can interoperate Europe possesses a technological and industrial base
 adequate to supply such capabilities and its defence strategies are gradually being modified to emphasize expeditionary
 forces operations within coalition settings However much remains to be done This volume tackles the key challenges facing
 European nations who need to operate alongside each other and with their North American allies more effectively and
 efficiently This book will be of great interest to all students of European affairs and politics international relations and
 military and strategic studies *The Economics of Creativity* Thierry Burger-Helmchen, 2013-02-11 Understanding the
 economic implication of creative individuals and firms is at the heart of the new economy and of related fields such as the
 economics of knowledge the economics of science and innovation management This book brings together a panel of
 theoretical and empirical contributions which address the generation of creative ideas and their transformation into products
 and services by firms or universities as well as the interplay of those organizations in networks and markets The word
 creativity has been used a great deal recently in relation to efforts to recover from the global financial crisis and re launch
 economic activity Little has been added to explain how and why an economic approach of creativity is useful and necessary It
 is useful to understand how the most creative people work and think and how to foster their creative productivity It is useful
 to understand how organizations integrate and exploit creative ideas It is useful to understand how market mechanisms can
 handle creativity and how policies must be adapted It is necessary in the light of the recent economic crises that made

innovation invention and creativity the basis of a new industrialization and fuel for a new economic development This new book assesses the economic impact of creativity defining the term and then going on to explore theoretically and practically the economic consequences of creativity through a range of themes including creativity and evolutionary theories of technological change creativity and organizational learning creativity and technological policy and creativity and economics of networks This volume offers a rich source of inspiration and ideas for the pursuit of research which merges economic tradition and management perspectives

Rising to the Challenge National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Comparative National Innovation Policies: Best Practice for the 21st Century, 2012-08-06 America's position as the source of much of the world's global innovation has been the foundation of its economic vitality and military power in the post war No longer is U S pre eminence assured as a place to turn laboratory discoveries into new commercial products companies industries and high paying jobs As the pillars of the U S innovation system erode through wavering financial and policy support the rest of the world is racing to improve its capacity to generate new technologies and products attract and grow existing industries and build positions in the high technology industries of tomorrow Rising to the Challenge U S Innovation Policy for Global Economy emphasizes the importance of sustaining global leadership in the commercialization of innovation which is vital to America's security its role as a world power and the welfare of its people The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage To this end both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States This report argues that far more vigorous attention be paid to capturing the outputs of innovation the commercial products the industries and particularly high quality jobs to restore full employment America's economic and national security future depends on our succeeding in this endeavor

Constructing the Composite Indicator "quality of Work" from the Third European Survey on Working Conditions Andranick S. Tanguiane, 2004

Environmental Indicators for North America United Nations Environment Programme, 2006 Although the environment of North America is not dissected by political borders Canada and the United States often measure environmental conditions and report on them using different indicators This report examines the environmental indicators used by both nations and based on analysis of current research into common methodologies used in national regional and global environmental reporting it goes on to draw lessons for the development of bilateral indicators to cover the North American region

Sustainable Development of Energy, Water and Environment Systems. N Vol. III Naim Afgan, 2007 Sustainability is a new important discourse aimed at promoting a new strategy in the development of energy water and environmental EWE systems the key components that affect the quality of life on our planet It is becoming increasingly clear that the quest for sustainable

development requires integrating economic social cultural political and ecological factors The behavior and properties of an EWE system arise not merely from the properties of its component elements but also to a large degree also from the nature and intensity of their dynamic interlinkages This volume helps clarify the complexity of these problems by providing a deeper understanding of the implications of the different aspects of sustainability This work contains a collection of selected peer reviewed and state of the art reflecting papers that were presented at the Third Dubrovnik Conference on Sustainable Development of Energy Water and Environment Systems that was held in June 5 10 2005 in Dubrovnik Croatia

The Art of Being a Scientist Roel Snieder, Ken Lerner, 2009-07-23 This is a hands on guide for graduate students and young researchers wishing to perfect the practical skills needed for a successful research career By teaching junior scientists to develop effective research habits the book helps to make the experience of graduate study a more efficient and rewarding one The authors have taught a graduate course on the topics covered for many years and provide a sample curriculum for instructors in graduate schools wanting to teach a similar course Topics covered include choosing a research topic department and advisor making workplans the ethics of research using scientific literature perfecting oral and written communication publishing papers writing proposals managing time effectively and planning a scientific career and applying for jobs in research and industry The wealth of advice is invaluable to students junior researchers and mentors in all fields of science engineering and the humanities The authors have taught a graduate course on the topics covered for many years and provide a sample curriculum for instructors in graduate schools wanting to teach a similar course The sample curriculum is available in the book as Appendix B and as an online resource

Legal Frameworks for the Integration of Third-Country Nationals Jan Niessen, Thomas Huddleston, 2009-06-02 The Migrant Integration Policy Index MIPEX is a unique comparative study on indicators of the legal integration of third country nationals Though comparing countries on the basis of various indicator types is common in the private sector and increasingly used in policy areas like development good governance and equality the exercise remains relatively new in justice and home affairs The book lays out the instruments used to construct the MIPEX and then situates the study within current debates on integration indicators and policy evaluation Each chapter considers what the study's key findings add to our understanding of the state of integration policy development across Europe and of recent legal and policy trends on anti discrimination naturalisation labour market access and political participation
