Among these supplements are the B-complex vitamins, GABA, and St. John's wort. These and other nutrients have been shown scientifically to help people deal effectively with stress. *User's Guide to the B-Complex Vitamins* Burt Berkson, Arthur J. Berkson, 2006-01-01 The B-complex vitamins are a family of nutrients that play multifaceted and essential roles in health and preventing disease. They are needed to make and repair DNA and increase energy levels, both key steps for slowing the aging process. Some B vitamins are needed to make mood-enhancing neurotransmitters such as serotonin and can have powerful antidepressant benefits. The B vitamin folic acid reduces blood levels of homocysteine, a known risk factor for heart disease, stroke, cancer, and Alzheimer's disease. Vitamin B12 is needed for normal mental function, and low levels can mimic senility. This book explores the remarkable benefits of these and the rest of the B-complex family of vitamins. *User's Guide to Nutritional Supplements* Jack Challem, 2003 The User's Guide to Nutritional Supplements focuses on the most popular nutritional supplements: those that consistently attract the most attention and are the ones most likely to benefit the majority of people. In describing the most popular nutritional supplements, this book explains: Vitamin E can reduce the risk of heart disease and the best types to take; Selenium can slash the chances of developing some types of cancer; Ginkgo can improve memory and recall; Chromium can help promote weight loss and lower the risk of diabetes; Glucosamine and chondroitin can prevent osteoarthritis; Calcium and magnesium work together to build strong bones; Coenzyme Q10 can boost your energy levels and strengthen your heart; Ginseng and other supplements boost your exercise stamina. **User's Guide to Heart-Healthy Nutrients** Michael Janson, 2004 In this concise User's Guide, Michael Janson describes the best nutritional and herbal supplements for preventing and reversing heart disease.
