

Think Through Math Games

TTM games prime students for the lesson by allowing them to practice procedures and recall facts that may be helpful in the lesson. TTM games build fluency and skills so students can better see relationships in new content. TTM games are designed so that success in the game is based on success with the math, not just success in mastering the game play.

Games are included as warm-up activities in most TTM lessons. These activities serve to engage students and ready them to learn new content.

There are 15 unique game types listed below. Each type of game has between 2 and 5 skins, which changes the appearance, but not the functionality of the game. Each of the 15 game types is designed to address specific content goals. As students play the games, they receive in-game, dynamic feedback to address errors and misconceptions.
