Multimodality, Digitalization and Cognitivity in Communication and Pedagogy

Natalya V. Sukhova, Tatiana Dubrovskaya, Yulia A. Lobina, 2021-10-21 This book positions itself at the intersection of the key areas of the modern humanities. Different authors from a variety of countries take innovative approaches to investigating multimodal communication, adapting pedagogical design to digital environments and enhancing cognitive skills through transformations in teaching and learning practices. The eclectic forms under study require eclectic approaches and methodologies and the authors cross disciplinary boundaries drawing on philosophy, linguistics, semiotics, computational linguistics, mathematics, cognitive studies and neuroaesthetics. Part I presents methods of analysing multimodal communication in its different displays covering promotional video in crowdfunding project presentations, multimodal public signs of prohibition and visuals as arguments. Part II explores varied teaching methodologies that have emerged as a result of and in response to modern technological changes and contains some practical hints for educators. It demonstrates the pedagogical potential of video games, virtual worlds, linguistic corpora and online dictionaries. Part III focuses on psychological and cognitive factors influencing success in the classroom, primarily ways of developing students and teachers' personalities. The volume sits at the intersection between Communication Studies, Digital Humanities, Discourse Analysis, Education Theory and Cognitive Studies and is useful to scholars and students of communication, languages, education and other areas of the humanities. This book should trigger scholarly discussions as well as stimulating practitioners' interest in these fields. Copyright Office, 1977 *New York School Journal*, 1894 **The Instruction Myth** John Tagg, 2019-04-05 Higher education is broken and we haven't been able to fix it. Even in the face of great and growing dysfunction, it seems resistant to fundamental change. At this point, can anything be done to save it? The Instruction Myth argues that yes, higher education can be reformed and reinvigorated, but it will not be an easy process. In fact, it will require universities to abandon their central operating principle, the belief that education revolves around instruction, easily measurable in course syllabi, credits and enrollments. Acclaimed education scholar John Tagg presents a powerful case that instruction alone is worthless and that universities should instead be centered upon student learning, which is far harder to quantify and standardize. Yet, as he shows, decades of research have indicated how to best promote student learning, but few universities have systematically implemented these suggestions. This book demonstrates why higher education must undergo radical change if it hopes to survive. More importantly, it offers specific policy suggestions for how universities can break their harmful dependence on the instruction myth. In this extensively researched book, Tagg offers a compelling diagnosis of what's ailing American higher education and a prescription for how it might still heal itself. ELT Christoph Haase, 2011-05-25 This volume represents an outgrowth of the 7th international ATECR

conference which brought together researchers and educators from fields as diverse as language teaching in a variety of contexts corpus linguistics and literary studies The contributions in this volume show despite their diversity a strong common denominator an aim to bundle efforts and unify parameters in order to optimize English Language Teaching as a world wide endeavor Thus for our teaching it can only be beneficial when linguists talk to literary minded teachers or methodology specialists investigate whether their theoretical underpinnings make their way into practice by talking to language instructors or language service providers In general the authors present a multifaceted picture of the English Language Teaching context with themselves as practitioners but also as investigators and researchers at the same time The research that reflects back on their teaching thus creates a force feedback loop not only for the investigating scholar but also for the practicing instructor who reapplies his her knowledge after failed or suboptimal attempts as evidenced by the data

Leading from the Inside Out David Grubb,Lynda Tredway,2015-12-03 This book proposes that the collective responsibility of teachers as classroom and school leaders working together to solve their own problems provides the fulcrum of school change It makes the case that teachers and school leaders do not operate in a vacuum but rather they work within the larger context of policy and other social influences Grubb and Tredway provide the building blocks of history policy and social analysis that are necessary if teachers are to be effective in the collective school a place where adults thrive as learners and are able to co create joyful learning experiences for children and youth By encouraging teachers to move out of the individual classroom and to think critically and institutionally about the schools they would like to work in about their own responsibilities for creating such schools about the range of policies from outside the school and how they can influence those policies rather than being subjected to them this book shows that a teacher s influence is not limited to the classroom and students but can significantly shape and inform external policies and decisions
