Mobile Networking with WAP, SCN Education B.V., 2013-11-11. Inspiration for the wireless revolution. The big Geneva Telecom 99 exhibition will probably go down in history as the moment when Wireless Application Protocol (WAP) made its debut in the world. A slew of vendors launched their first WAP phones, and carriers announced their first WAP services. And this time it's Europe that's the frontrunner. For once I'm not proud to be an American, said Larry Ellison, the CEO of softwaremaker Oracle, in a speech delivered at Telecom 99. Europe is at least 18 months ahead of the United States in deploying WAP. The Telecom 99 show could mark the beginning of a bright, very bright future for WAP. Analysts predict that a significant part of Internet access will be via wireless devices within a few years. It's important not to get carried away. When the computer industry gets hold of a new concept like WAP, it becomes the Next Big Thing. Vendors pre-announce products, and the mass media prints hype. When the revolution fails to materialize during the following months, the hype will die soon. But this time it's different. The business case is overwhelming; the numbers are staggering, and it's the cash-loaded telecom industry that is delivering the key products. Mobile Multimedia Processing, Xiaoyi Jiang, Matthew Y. Ma, Chang Wen Chen, 2010-04-14. The portable device and mobile phone market has witnessed rapid growth in the last few years, with the emergence of several revolutionary products such as mobile TV, converging iPhone, and digital cameras that combine music, phone, and video functionalities into one device. The proliferation of this market has further benefited from the competition in software and applications for smart phones, such as Google's Android operating system and Apple's iPhone App Store.
