**Best Business Practices of Self Help Groups** Sundari Suresh, Self help groups are crucial for employment generation for a large portion of the population. The acceptability of their produce and sustainability is very important for the social economic well being of the group members. This book based on my Ph D research focuses on the acceptability of the products of self help groups by its market and to explore the best business practices adopted by them. When we look at Corporate World we find the likes of Dhirubhai Ambani, Tata, Birla, Godrej, and many others who have made it BIG through their indomitable spirit and indefatigable passion to ascend to the pinnacle of greatness. The common aspect of many legendary names in Corporate World is their tireless tirade to achieve their mark despite several handicaps, sometimes in the form of a humble background, financial crisis, social ostracism, tragedies, and formal educational acquisitions. These are people who re-write history through the ink of their sweat, tears, and blood to provide the world with the deepest thoughts of motivation to overcome the times of crises. All entrepreneurs have the same expectations, same emotions, same problems, same passion to come up in life and progress in their own business. The world deserves to know about these SHGs and their marketing practices to hold on to diversity and humanity together. I humbly present this book to the current and budding Women SHG fraternity to realize their contribution towards our country's economy.

will be developed in the following papers presented in this Issue

**METHODOLOGY** This study employs a theoretical approach based on a narrative literature review The primary attention is focused on applying financial technology as a stimulant for the finance of SMEs in developing countries

**FINDINGS** As a consequence of the financing gap for SMEs within the traditional financial system these entities use non bank financing based on financial technology The research confirms that financial technology plays a crucial role in fostering the financial situation of SMEs in developing countries and providing greater financial inclusion for these entities Both financial technology and enterprises based on this technology contribute significantly to the improvement of efficiency of financing SMEs in emerging markets They also provide a broader range of services than were offered by the traditional financial sector Regarding the other aspects of SME finance it is essential to implement such ways of financing like microfinance services and crowdfunding Such funding mechanisms together with the budget process and the compliance under the conditions of e tax systems are important determinants of current entrepreneurial finance

**IMPLICATIONS** The paper describes the financing of SMEs in developing countries The in depth picture of the SME s financial situation focusing on the technological development in this area provides essential insight into this still poorly explored area It also offers important premises for shaping the post pandemic policy to support their further growth

**ORIGINALITY VALUE** Despite growing theoretical and empirical literature about entrepreneurial finance this study aims to contribute to the role of financial technology in this area The impact of financial technologies and the role of fintech based entities on SME activity in developing countries are still poorly researched Moreover the research provides a brief overview of other SME funding sources and their determinants in this group of countries
