Crystal Reports .NET Programming Brian Bischof, 2004 I wrote this book from the perspective of a programmer wanting to learn how to integrate reports within a NET application I ve been working with Crystal Reports since Visual Basic 3 and it s always been difficult to find technical information on report writing I spent a year and a half researching what NET programmers need to successfully create implement and deploy a Crystal Reports application I even put the book on the internet for everyone to read for free all of last year This generated an incredible number of emails from programmers telling me what they liked disliked and what was missing from the book I learned that there are two distinct types of NET programmers using Crystal Reports The first type of programmer doesn t have much experience with Crystal Reports and wants a series of tutorials to help them build reports from scratch For this programmer I wrote 13 chapters which teach you everything about adding reports to ASP NET and Windows applications It starts with the basics of building reports to adding charts crosstab reports sorting and grouping subreports and using the formula editor with Basic syntax and Crystal syntax The second type of programmer has been using Crystal Reports for years and is mostly concerned with how to do technical runtime customization of reports For this programmer I researched and diagrammed the undocumented report object models I included dozens of examples in both VB NET and C to show you how to modify reports manipulate different data sources XML ADO NET ODBC OLE DB stored procedures with parameters modify formulas and report parameters and integrate NET with the RAS and RDC The dozens of emails I received when the book was online were instrumental for doing a major revision of many chapters before publishing the book in hardcopy format Since releasing the book I continue to receive more

emails from people They regret that the free book isn't online anymore but understand that it couldn't last forever and that the hardcopy version is even better I hope you like it and that it helps you achieve your reporting goals September 2004 Update Due to high demand I did a second printing of the book I took advantage of this opportunity to go through the book and remove all grammatical errors The content is the same but the typos have been corrected *Mastering Business Analysis with Crystal Reports 9* Chris Tull, 2004 This book discusses in detail the different features of the Crystal Reports software provides information on how to use Crystal Reports with different data sources and includes reference material on useful formulas and functions for business report writers *Crystal Reports 2008 Official Guide* Neil FitzGerald, 2008-10-02 CRYSTAL REPORTS 2008 OFFICIAL GUIDE Whether you're a DBA, data warehousing or business intelligence professional, reporting specialist or developer, this book has the answers you need Through hands-on examples you'll systematically master Crystal Reports and Xcelsius 2008's most powerful features for creating, distributing and delivering content One step at a time long-time Crystal Reports insiders take you from the basics through advanced content creation and delivery using Xcelsius Crystal Reports Server, crystalreports.com and the offline Crystal Reports Viewer Every significant enhancement introduced in Crystal Reports 2008 is covered including its new visualization options and more robust Web services capabilities The book concludes by showing how to use Crystal Reports' powerful .NET and Java SDKs to customize and extend enterprise reporting in virtually unlimited ways Learn hands-on through step-by-step examples and exercises and discover tips and tricks proven in real-world enterprise environments Master new Crystal Reports 2008 features including interactive report viewing, Xcelsius dashboarding, Flex and Flash integration, Report Designer improvements, report bursting and more Publish professional quality reports against virtually any data source including relational and OLAP databases, Universes, SAP, PeopleSoft, JavaBeans, .NET COM objects, XML and more Discover advanced visualization techniques using Xcelsius charts and maps Learn methods for distributing reports and integrating content into other applications Learn about the latest reporting addition to the Business Objects family, Xcelsius, and begin creating dynamic and interactive dashboards NEIL FITZGERALD has spent several years working at Business Objects and with one of Business Objects' largest providers of custom BI and enterprise reporting solutions BOB COATES currently works as a Sales Consultant for Business Objects, an SAP company where he has been employed for more than eleven years RYAN GOODMAN is the founder of Centigon Solutions Inc and remains one of the top Xcelsius experts and evangelists in the world MICHAEL VOLOSHKO is a senior presales consultant for the financial services team at Business Objects ON THE WEB Find all this and more at informit.com/sams Java and .NET sample reports and code samples for all examples in the book Bonus chapters, tips, tricks and links to great reporting resources CATEGORY Database COVERS Crystal Reports 2008 Crystal Reports Server 2008 Crystal Reports Viewer, crystalreports.com Xcelsius 2008 USER LEVEL Beginning Intermediate [Professional Crystal Reports for Visual Studio .NET](#) David McAmis, 2004-04-14 What is this book about The addition of Crystal Reports 9.0 to Visual Studio .NET
