for the more robust human species that now roam the planet The technologically advanced society of genetically enhanced humans organized in Conclaves and living in 2098 is now run by the younger generation when it suddenly falls prey to an unknown bio dust cloud As people collapse dead or disappear a way of life becomes extinct and the few survivors scramble to reverse the effects on their fragile world Among the five Conclaves the Elite led the charge and fought to survive finding allies in factions that would have customarily opposed them in the conflict This battle transcends time and space over many lifetimes and is a beginning with no end in sight

An Analysis of Hannah Arendt's The Human Condition Sahar Aurore Saeidnia, Anthony Lang, 2017-07-05 Hannah Arendt's 1958 *The Human Condition* was an impassioned philosophical reconsideration of the goals of being human In its arguments about the kind of lives we should lead and the political engagement we should strive for Arendt's interpretative skills come to the fore in a brilliant display of what high level interpretation can achieve for critical thinking Good interpretative thinkers are characterised by their ability to clarify meanings question accepted definitions and posit good clear definitions that allow their other critical thinking skills to take arguments deeper and further than most In many ways *The Human Condition* is all about definitions Arendt's aim is to lay out an argument for political engagement and active participation in society as the highest goals of human life and to this end she sets about defining a hierarchy of ways of living a *vita activa* or active life The book sets about distinguishing between our different activities under the categories of labor work and action each of which Arendt carefully redefines as a different level of active engagement with the world Following her clear and careful laying out of each word's meaning it becomes hard to deny her argument for the life of action as the highest human goal

The Struggle for a Human Future Jeremy Naydler, PH.D., 2020-04-14 With its wireless networks encompassing the globe the Digital Revolution is altering the very fabric of our lives with alarming rapidity New technologies are bringing about an ever closer union between human beings and machines whilst at the same time transforming our planet into an increasingly hybrid cyber physical world The current rollout of fifth generation wireless communication networks or 5G is central to the project to create a global electronic ecosystem in which we will be obliged to live This will provide the basis for an all pervasive Internet of Things and the widespread integration of Augmented and Virtual Reality into human experience But what genuine human needs will this serve Does the planet really need to be made smart Will our health and that of other living creatures really be unaffected by exposure to escalating levels of electromagnetic radiation As we enter a new era of extreme technology driven by a momentum that seems beyond the constraint of any spiritual or moral consideration both human beings and nature face an unprecedented challenge Jeremy Naydler argues that it is a challenge that can only be met through a re-affirmation of essential human values and the recovery of a sacred view of nature From this grounding we can work towards a truly human future that rather than creating yet more pollution and toxicity will bring blessing to the natural world to which we belong
