Lissitz, Hong Jiao, 2014-12-01 Modeling student growth has been a federal policy requirement under No Child Left Behind NCLB In addition to tracking student growth the latest Race To The Top RTTP federal education policy stipulates the evaluation of teacher effectiveness from the perspective of added value that teachers contribute to student learning and growth Student growth modeling and teacher value added modeling are complex The complexity stems in part from issues due to non random assignment of students into classes and schools measurement error in students achievement scores that are utilized to evaluate the added value of teachers multidimensionality of the measured construct across multiple grades and the inclusion of covariates National experts at the

Twelfth Annual Maryland Assessment Research Center's Conference on Value Added Modeling and Growth Modeling with Particular Application to Teacher and School Effectiveness present the latest developments and methods to tackle these issues. This book includes chapters based on these conference presentations. Further, the book provides some answers to questions such as: what makes a good growth model? What criteria should be used in evaluating growth models? How should outputs from growth models be utilized? How auxiliary teacher information could be utilized to improve value added? How multiple sources of student information could be accumulated to estimate teacher effectiveness? Whether student level and school level covariates should be included? And what are the impacts of the potential heterogeneity of teacher effects across students of different aptitudes or other differing characteristics on growth modeling and teacher evaluation? Overall, this book addresses reliability and validity issues in growth modeling and value added modeling and presents the latest development in this area. In addition, some persistent issues have been approached from a new perspective. This edited volume provides a very good source of information related to the current explorations in student growth and teacher effectiveness evaluation.

**Timbuktu Academy's U-Turn** Warrington S. Parker Jr., Bernard F. Parker Jr., Brenda A. Cunningham-Parker, 2024-12-26. This is a story about the Academy's rich history encompassing its successes, challenges, the impact of location changes, growth issues with teacher certifications and schoolwide assessment results. It also highlights the Academy's value to the community. This school serves underserved, deserving students living in a poverty-level community with many children experiencing chronic toxic stress conditions that adversely affect their brain development and learning.

**The Hitchhiker's Guide to Writing Research** Xinghua Liu, Michael Hebert, Rui A. Alves, 2023-09-30. This book brings together the work of established scholars from around the world to celebrate and honor the many ways in which Steve Graham has contributed to the advancement of teaching and researching writing. Focusing on writing development and writing instruction in different contexts of education, original contributions in this book critically engage with theoretical and empirical issues raised in Steve Graham's influential body of work and significantly extend our understandings of the importance of writing in developing learners' literacy and the roles of writing in teaching and learning processes. This book is organized around themes central to Steve Graham's work, including theories and models of writing, effective instructional methods in teaching writing, surveys on teaching and learning writing, and systematic review studies on writing. Apart from regular chapters, the book also features personal and scholarly reflections revealing the powerful ways in which Steve Graham's work has influenced our thinking in the field of writing research and continues to open up new avenues for future research endeavors.

**Supporting and Accommodating Students with Special Health Care Needs** Azure D. S. Angelov, Mary Jo Rattermann, 2023-12-06. Schools are increasingly responding to the impact and prevalence of special health care needs among children and youth. COVID-19 brought the health needs of many students to the forefront. Now more than ever, it is crucial for educators to plan for working with students with health needs. Many of these students with health needs are

eligible for special education and related services and will need programming appropriate to address their unique needs. Further, school teams and special education personnel must continually ensure that goals and services within an IEP consider the student's individual circumstances and impact on functioning. This book will provide strategies for supporting students with health care needs throughout their education, including referral, family engagement, report writing, IEP design, and implementation. Fortunately, school teams can apply many components of a health care needs approach to developing IEPs regardless of the concern or the existence of a medical history. This book provides guidance to educators to assist in the development of legally defensible IEPs for all students, particularly those with a known or suspected history of health care needs. Specifically, the book will help:

- Provide a clear description of the impact of adversity and health care needs on student functioning, particularly for students with disabilities.
- Describe how symptoms of health care needs map onto existing disability categories within IDEA.
- Apply a supportive approach to family engagement, assessment, and report writing.
- Take a different approach to PLAAFPs.
- Establish goals that are legally defensible and are written in light of the child's circumstances.
- Viewing behavioral concerns as a skill deficit rather than purely a performance deficit.

Beyond the objectives described above, the information is particularly valuable given ongoing state and local legislation mandating schools become more aware of students with health care needs and apply those approaches to all aspects of our work in schools, e.g., interactions, discipline, interventions. Despite the significant increase in recognizing the impact of students with health care needs, few books have operationalized that to the various components of service delivery. This book is the first of its kind in operationalizing a health care-informed approach to IEP development.

**Twin Pandemics** Alison L. Bailey, Jose Felipe Martinez, Andreas Oranje, Molly Faulkner-Bond, 2023-09-19. This book examines how the COVID-19 pandemic and racial inequities affect the educational assessment of students, either separately or in combination, as the health crisis was viewed as a factor intersecting with and exacerbating existing racial inequities in educational systems. The four empirical papers in this book attend to the challenges of implementing virtual standardized testing during the coronavirus pandemic, the different educational and assessment experiences of diverse groups of school-age students, and the reconsideration of traditional assessment approaches in response to mounting research evidence and growing concerns around enduring social and racial inequities faced by Black, Latinx, Asian, Indigenous, and other non-white citizens and communities. The four conceptual papers focus primarily on the ways in which assessment may contribute to systemic racism and offer potential solutions to move the educational assessment field forward. In totality, the volume offers needed empirical evidence, innovative methodological approaches, and theoretical and substantive examinations of the effects of the twin pandemics. *Twin Pandemics* will be a key resource for academics, researchers, and advanced students of Educational Assessment, Education, Psychometrics, Educational Research, Ethnic Studies, Research Methods, Sociology of Education, and Psychology. The chapters included in this book were originally published as a special issue of *Educational Assessment*.

**Mismeasuring Schools' Vital Signs** Steve Rees, Jill

Wynns,2022-09-29 This book helps school and district leaders avoid the pitfalls that await those making sense of their school's data. Whether you're interpreting achievement gaps, graduation rates, or test results, you're at risk of reaching a mistaken judgment. By learning about common errors and how they're made, you'll be ready to choose safer, surer paths to making better sense of the wealth of data in your school or district. The authors help educators build better evidence, see conclusions more clearly, and explain the data more persuasively. Special features include Questions to Spark Discussion in each chapter, encourage school site, district leaders, and board trustees to apply each chapter's content to their own situations. Data visualizations, together with the authors' interpretations, will help you learn how to do visual analysis and reach the right conclusions. Practical tips provide clear guidance. Supplemental resources can be found at the book's website, [k12measures.com](http://k12measures.com), including interactive data visualizations and analytic exercises to help you learn a concept by doing.
