Financial Ecologies Framed by Fintech
Marta Gancarczyk, Małgorzata Kutera, Óscar Rodil-Marzábal, 2022-01-01 Financial technologies are understood as ICT based financial innovations and business entities based on these innovations Lai Langley W jcik 2021b Like other technological innovations Fintech not only influences technical parameters of products and services but also transforms the economic organization of firms and industries Baldwin 2020 Sanchez Spigel 2022 However the ongoing digital transformation of financial services has a strong spatial and multiscalar dimension and takes various forms and outcomes depending on the socioeconomic and institutional specifics Leyshon 2020 Baranauskas 2021 Coe 2021 The financial sector has recently been conceptualized as a financial ecosystem to reflect its exposition to dynamics and occasional disruptive change Leyshon 2020

Within a broadly defined financial ecosystem two interrelated structures can be identified according to spatial characteristics Gancarczyk asak Lai 2020 The first comprises global networks of financial centers and large investment banks that is global financial networks GFNs largely spanning over the borders of countries and regions Coe Lai Coe 2021 The other forms are financial ecologies as segments of the financial ecosystem that are delimited by particular territories Lai 2016 Leyshon et al 2004 Leyshon et al 2006 Langley DawnBurton 2020 Lai 2016 Leyshon et al 2004 Leyshon 2020 In this vein FEs can be considered as governance modes comprising private and public entities such as banks Fintech BigTech public agencies enterprises and customers and relationships among these entities The actors and relationships are delimited by a given location such as a region or city Langley 2016 DawnBurton 2020 Chen Appleyard 2020 The relevance of the FE concept is based on the disproportionate outcomes that small ecologies may raise for comprehensive systems as evidenced by the subprime market failure in the USA affecting the subsequent financial and economic crisis of 2007 2009 Leyshon 2020 with relevant effects on many economies such as the European economy Rodil Marza bal W jcik 2021a One of the main influences comes from the recent technological developments raised by Fintech The growing empirical evidence in this area calls for understanding consequences for the FE construct Welch Rumyantseva Simsek et al 2017 and concept reconstruction Welch et al 2016 The method includes a systematic literature review which represents a unique approach since the existing theorizing of FEs has been either in the form of conceptual papers or narrative reviews Lund et al 2016 Our findings raise conceptual and policy related contributions First the article conceptually reframes the understanding of FE as financial services governance enhanced by technological advancements and focused on territorial projects and communities Second the concept of FE was clarified according to its main elements and its relationships with other adjacent ideas of spatial networking for socioeconomic development Third research propositions and areas for further investigation were proposed In the following we present the literature review to justify our aim and research questions The methodology section presents the conceptual lens for our discussion of the FE as a construct shaped by Fintech it also specifies the method of a systematic literature review Results discussion and conclusion proceed in the next sections

CONCEPTUAL FOUNDATIONS

Financial ecosystems were institutionally introduced to the policy framework and gained widespread recognition in research since the Federal Reserve Bank of New York conference in 2006 Leyshon 2020 FEs have become a new theoretical abstraction of the financial services sector as an alternative to the neoclassical equilibrium based doctrine Leyshon 2020 The main difference was in acknowledging radical dynamics within the sector treated as an ecosystem with a diverse and flexible set of financial intermediaries institutional investors and supporting entities such as exchanges data providers and regulators Bose Dong Ponte Chen Coe Fasnacht 2018 Furthermore within this idea the classical goals set for the financial sector such as optimizing capital allocation matching savers and investors and signaling scarcity and abundance were expanded by sustainability and social responsibility goals that go beyond purely economizing Bose et al 2019 Fasnacht 2018 The focus on the financial

ecosystem as a model or abstraction of the financial sector predominated over what is the core of ecosystems the interrelated actors embedded in particular socio economic and institutional environments Strumeyer Bose et al 2019 Lai 2020 Wojcik 2021 Although the legal frameworks of financial ecosystems are intensely studied the remaining context such as socioeconomic environment and informal institutions remain much less explored Gancarczyk et al 2022 These contextual factors are specific to individual territories within the financial ecosystem Ponte Chen Coe Leyshon 2020 Furthermore research on FEs signals weak and strong points in subsystems that can affect the efficiency of the entire financial system FEs represent interrelated financial intermediaries and other economic agents focused on the provision of and access to financial services in particular territories Leyshon 2020 As systemic phenomena they comprise both actors and their relationships in which actors form various configurations of private and public entities such as banks public agencies enterprises and customers The actors and relationships are delimited by a given location that forms a spatial context that is a set socioeconomic conditions of a territory be it a region city or a country and acknowledging multiscalar contexts Langley 2016 DawnBurton 2020 Chen Appleyard 2020 The context of a particular ecology should also be considered in a wider multiscalar perspective Multiscalarity of the context is an idea that advocates a multilevel analysis of a spatial unit Chen Ostrom 1986 Williamson 2000 In this vein governance can be described according to the rules of collaboration and competition and power relations Lai 2018 Types of governance range from the firm to hybrids such as networks and to markets Gereffi Humphrey Williamson 2000 The outcomes of FE represent the terms of and access to financing with a more general effect on financial inclusion or exclusion and on the overall territorial development With the wider financial systems FEs share such constitutive elements as actors and their relationships centered around financial services supply and demand Bose et al 2019 Fasnacht 2018 Lai 2020 Moreover they similarly focus on the coordination of the system through the lens of governance DawnBurton 2020 Langley Leyshon et al 2004 The focus on a particular territory does not ignore the systemic nature of economic relationships in the globalized world since FEs are considered in a multiscalar context Chen Leyshon 2020 Connectivity of given populations to a broader financial system becomes one of the major issues to ensure the infusion of external sources Coe et al 2014 The focus on relationships between commercial banks and retail customers as well as underserved and unbanked individuals or enterprises differentiates FEs from GFNs Beaverstock et al 2013 Coe et al 2014 DawnBurton 2020 The latter consider global networks of investment banks and financial centers liaising over peripheral and noncore territories Coe et al 2014 DawnBurton 2020 Lai 2018 This global perspective is also related to the governance approach in the framework of global value chains which extends to financial activity Milberg 2008 Coe et al 2014 Seabrooke Langley asak Gancarczyk et al 2022 Similarly the intensive development of FEs is closely related to technological changes that enable a flexible establishment of new forms of cooperation between economic entities Arsanian Livesey 2018 Nicoletti et al 2017 Sabatini Cucculelli Scardovi 2017 However negative effects are also reported such as over indebtedness of risky customers

Fintech surveillance and exclusion of some customers due to computer illiteracy Kong asak Brooks 2021 The economic and social outcomes of the emerging FEs transformed by Fintech have not been fully understood and systemized Langley W jcik 2021b Given technological influences the FE undergoes developments in its core elements i e actors governance and outcomes acknowledging spatial contexts Despite the increasing stock of empirical findings that describe the impact of Fintech on the functioning of FEs we lack a synthesis reflection to reconsider FEs from this perspective Therefore we formulate the following research questions RQ1 How does Fintech affect the FE phenomenon in the area of its actors governance and outcomes in various spatial contexts RQ2 What are the conceptual and policy related implications of Fintech influencing FEs
