efforts In 1989 Zimmerman and Schunk edited the first book devoted to this topic They assembled key theorists offering a

generation of research It also addresses a number of key issues that have arisen since then such as how self regulation  
differs from such related constructs as motivation and metacognition and whether students can be taught self regulatory  
skills The contributors reveal an interesting uplifting and at times disturbing picture of how students grapple with the day to  
day problems of achieving in circumstances with inherent limitations and obstacles This volume provides insight into the  
source of students capabilities to surmount adversities the origins of their self initiated processes designed to improve  
learning motivation and achievement The text is organized on the basis of a conceptual framework that analyzes academic  
self regulation into four major dimensions That model is presented in the first chapter and key processes that influence each  
of these dimensions are discussed by prominent researchers in the chapters that follow Because each chapter is written to  
follow a common format this work provides a level of continuity and parsimony normally found only in authored textbooks
