**Fate Of Schrodinger's Cat, The: Using Math And Computers To Explore The Counterintuitive** James D Stein, 2020-07-14 Can we correctly predict the flip of a fair coin more than half the time or the decay of a single radioactive atom Our intuition based on a lifetime of experience tells us that we cannot as these are classic examples of what are known to be 50 50 guesses But mathematics is filled with counterintuitive results and this book discusses some surprising and entertaining examples It is possible to devise experiments in which a flipped coin lands heads completely at random half the time but we can also correctly predict when it will land heads more than half the time The Fate of Schrodinger s Cat shows

how high school algebra and basic probability theory with the invaluable assistance of computer simulations can be used to investigate both the intuitive and the counterintuitive This book explores fascinating and controversial questions involving prediction decision making and statistical analysis in a number of diverse areas ranging from whether there is such a thing as a hot hand in shooting a basketball to how we can successfully predict more than half the time the decay of the radioactive atom that determines the fate of Schrodinger's Cat

**The Power of Picture Books in Teaching Math and Science** Lynn Columbia, 2017-05-12 This book's 50 plus lessons each based on a different picture book or story will help classroom teachers build a foundation for teaching math science and social studies concepts to their students Each lesson uses children's literature to make challenging abstract concepts relevant to children's lives inviting them to learn these concepts while responding to a story's illustrations theme characters and plot The lessons also demonstrate how teachers can use children's literature to meet national standards in math science and social studies Chapters 1 through 5 set the stage for using picture books discussing the effective imaginative integration of literature into the classroom Teachers will learn to create an environment that ensures that when children and books come together the experience is enjoyable and thought provoking Chapters 6 through 9 provide individual lessons by grade level with detailed activities based on specific books
