Bonsall, 2015 Society does not generally expect its farmers to be visionaries Perhaps not but longtime Maine farmer and  
homesteader Will Bonsall does possess a unique clarity of vision that extends all the way from the finer points of soil fertility  
and seed saving to exploring how we can transform civilization and make our world a better more resilient place In Will  
Bonsall s Essential Guide to Radical Self Reliant Gardening Bonsall maintains that to achieve real wealth we first need to  
understand the economy of the land to realize that things that might make sense economically don t always make sense  
ecologically and vice versa The marketplace distorts our values and our modern dependence on petroleum in particular  
presents a serious barrier to creating a truly sustainable agriculture For him the solution is first and foremost greater self  
reliance especially in the areas of food and energy By avoiding any off farm inputs fertilizers minerals and animal manures  
Bonsall has learned how to practice a purely veganic or plant based agriculture not from a strictly moralistic or philosophical  
perspective but because it makes good business sense spend less instead of making more What this means in practical terms  
is that Bonsall draws upon the fertility of on farm plant materials compost green manures perennial grasses and forest  
products like leaves and ramial wood chips And he grows and harvests a diversity of crops from both cultivated and perennial  
plants vegetables grains pulses oilseeds fruits and nuts even uncommon but useful permaculture plants like groundnut Apios  
In a friendly almost conversational way Bonsall imparts a wealth of knowledge drawn from his more than forty years of  
farming experience My goal he writes is not to feed the world but to feed myself and let others feed themselves If we all did
