## Operating Your Snow Thrower

### WARNING

Read, understand, and follow all instructions and warnings on the machine and in this manual before operating.

Use extreme care when handling gasoline. Gasoline is extremely flammable and the vapors are explosive. Never fuel the machine indoors or while the engine is hot or running. Extinguish cigarettes, cigars, pipes and other sources of ignition.

## Know Your Snow Thrower

Figure 4-1

Now that you have set up your snow thrower for operation, get acquainted with its controls and features. These are described below and illustrated on this page. This knowledge will allow you to use your new equipment to its fullest potential.

**NOTE:** For detailed starting instructions and more information on all engine controls, refer to the separate engine manual packed with your unit.

### Shift Lever

The shift lever is located in the center of the handle panel and is used to determine ground speed and direction of travel. It can be moved into any of eight positions.

**IMPORTANT:** Always release drive control before changing speeds.

**Forward:** The snow thrower has six forward (F) speeds. Position one (1) is the slowest and position six (6) is the fastest.

**Reverse:** The snow thrower has two reverse (R) speeds—R1 is the slower of the two.

### Choke Control

The choke control is found on the top of the engine and is activated by rotating the knob counter clockwise. Activating the choke control closes the choke plate on the carburetor and aids in starting the engine.

### Primer

Depressing the primer forces fuel directly into the engine's carburetor to aid in cold-weather starting.

### Oil Fill

Engine oil level can be checked and oil added through the oil fill.

### Safety Key

The safety key must be pushed in place in order for the engine to start. Pull the safety key out to prevent unauthorized use of equipment.

### Rocker Switch

The rocker switch is used to stop the engine. The switch must be in the "ON" position in order to start the engine.
