Indigenous Bodies, Cells, and Genes Joanna Ziarkowska, 2020-10-08 This book explores Native American literary responses to biomedical discourses and biomedicalization processes as they circulate in social and cultural contexts Native American communities resist reductivism of biomedicine that excludes Indigenous and non Western epistemologies and instead draw attention to how illness healing treatment and genetic research are socially constructed and dependent on inherently racist thinking This volume highlights how interventions into the hegemony of biomedicine are vigorously addressed in Native American literature The book covers tuberculosis and diabetes epidemics the emergence of Native American DNA discoveries in biotechnology and the problematics of a biomedical model of psychiatry The book analyzes work by Louise Erdrich Sherman Alexie LeAnne Howe Linda Hogan Heid E Erdrich Elissa Washuta and Frances Washburn The book will appeal to scholars of Native American and Indigenous Studies as well as to others with an interest in literature and medicine

Innovations and Implementations of Computer Aided Drug Discovery Strategies in Rational Drug Design Sanjeev Kumar Singh, 2021-02-02 This book presents various computer aided drug discovery methods for the design and development of ligand and structure based drug molecules A wide variety of computational approaches are now being used in various stages of drug discovery and development as well as in clinical studies Yet despite the rapid advances in computer software and hardware combined with the exponential growth in the available biological information there are many challenges that still need to be addressed as this book shows In turn it shares valuable insights into receptor ligand interactions in connection with various biological functions and human diseases The book discusses a

wide range of phylogenetic methods and highlights the applications of Molecular Dynamics Simulation in the drug discovery process. It also explores the application of quantum mechanics in order to provide better accuracy when calculating protein ligand binding interactions and predicting binding affinities. In closing, the book provides illustrative descriptions of major challenges associated with computer aided drug discovery for the development of therapeutic drugs. Given its scope, it offers a valuable asset for life sciences researchers, medicinal chemists, and bioinformaticians looking for the latest information on computer aided methodologies for drug development together with their applications in drug discovery.
