

## ASSESSMENT

# Timed Up & Go (TUG)

**Purpose:** To assess mobility

**Equipment:** A stopwatch

**Directions:** Patients wear their regular footwear and can use a walking aid, if needed. Begin by having the patient sit back in a standard arm chair and identify a line 3 meters, or 10 feet away, on the floor.

### ① Instruct the patient:

When I say "Go," I want you to:

1. Stand up from the chair.
2. Walk to the line on the floor at your normal pace.
3. Turn.
4. Walk back to the chair at your normal pace.
5. Sit down again.

**NOTE:**  
Always stay by  
the patient for  
safety.

### ② On the word "Go," begin timing.

### ③ Stop timing after patient sits back down.

### ④ Record time.

Time in Seconds: \_\_\_\_\_

An older adult who takes  $\geq 12$  seconds to complete the TUG is at risk for falling.

CDC's STEADI tools and resources can help you screen, assess, and intervene to reduce your patient's fall risk. For more information, visit [www.cdc.gov/steadi](http://www.cdc.gov/steadi)

Patient: \_\_\_\_\_

Date: \_\_\_\_\_

Time: \_\_\_\_\_ ☐ AM ☐ PM

## OBSERVATIONS

Observe the patient's postural stability, gait, stride length, and sway.

Check all that apply:

- ☐ Slow tentative pace
- ☐ Loss of balance
- ☐ Short strides
- ☐ Little or no arm swing
- ☐ Steadying self on walls
- ☐ Shuffling
- ☐ En bloc turning
- ☐ Not using assistive device properly

These changes may signify neurological problems that require further evaluation.

## **Tug Test Home Health:**

**Clinical Case Studies in Home Health Care** Leslie Neal-Boylan, 2011-11-22 Home health care is an important aspect of community health and a growing area of healthcare services Clinical Case Studies in Home Health Care uses a case based approach to provide home healthcare professionals educators and students with a useful tool for thoughtful holistic care The book begins with a thorough and accessible introduction to the principles of home health care including a discussion of supporting theoretical frameworks and information on managing complexities transitioning patients to home care and preparation for the home visit Subsequent sections are comprised entirely of case studies organized by body system Though cases are diverse in content each is presented in a consistent manner incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation Cases also include helpful tips about reimbursement practices cultural competence community resources and rehabilitation needs **Nursing**

**Case Studies on Improving Health-Related Quality of Life in Older Adults** Meredith Wallace Kazer, Kathy Murphy, 2015-04-13 This globally focused resource integrates sound research evidence real life case scenarios and effective practical strategies to address a key health care initiative of the 21st century optimal quality of life for older adults Distinguished by its broad and global outlook the book includes contributions from an international cadre of widely published scholars and is designed for easy integration into traditional nursing education curricula The book explores the experiences of older adults at home and in acute and primary care assisted living nursing home and hospice environments and examines their needs for dealing with multiple differentiated health spiritual and emotional considerations *Out of Practice* Frederick M. Barken, 2011-04-15 Primary care medicine as we know and remember it is in crisis While policymakers government administrators and the health insurance industry pay lip service to the personal relationship between physician and patient dissatisfaction and disaffection run rampant among primary care doctors and medical students steer clear in order to pursue more lucrative specialties Patients feel helpless well aware that they are losing a valued close connection as health care steadily becomes more transactional than relational The thin margin efficiency rapid pace and high volume demanded by the new health care economics do not work for primary care an inherently slower more personal and uniquely tailored service In *Out of Practice* Dr Frederick Barken juxtaposes his personal experience with the latest research on the transformations in the medical field He offers a cool critique of the market model of medicine while vividly illustrating how the seemingly inexorable trend toward specialization in the last few decades has shifted emphasis away from what was once the foundation of medical practice Dr Barken addresses the complexities of modern practice overuse of diagnostic studies fragmentation of care increasing reliance on an array of prescription drugs and the practice of defensive medicine He shows how changes in medicine the family and society have left physicians to deal with a wide range of geriatric issues from limited mobility to dementia that are not addressed by health care policy and are not entirely amenable to a physician's prescription

Indeed Dr Barken contends the very survival of primary care is in jeopardy at a time when its practitioners are needed more than ever Illustrated with case studies gleaned from more than twenty years in private practice and data from a wide range of sources Out of Practice is more than a jeremiad about a broken system Throughout Dr Barken offers cogent suggestions for policymakers and practitioners alike making clear that as valuable as the latest drug or medical device may be a successful health care system depends just as much on the doctor patient relationship embodied by primary care medicine
