Samuel, Oluseyi Olanrewaju Ajayi, Abimbola Patricia Popoola, Diana-Andra Borca-Tasciuc, 2024-03-15

In this industrial and technological age energy plays a principal role in sustainable development This is connected to issues regarding availability

production processes utilization and environmental impact Due to the increased rate of population growth the energy

demand in the entire world is getting to the level that it may not be sustained in the nearest future if drastic action is not

taken to address the situation especially from research and development perspectives None of the millennium development

goals MDGs can be completed without considerable improvements in the quality and quantity of energy services in

developing countries according to the United Nations Development Programme UNDP Based on this fact UNDP is making

efforts especially in developing countries to ensure that people have access to sustainable sources of clean reliable and

affordable energy since every aspect of human development is highly impacted by this vital resource
