Mosberg,Carrie Haskell-Luevano,Tomi K. Sawyer,2020-03-13 Advances in Peptide and Peptidomimetic Design Inspiring Basic Science and Drug Discovery is a book dedicated to Prof Victor J Hruby on the occasion of his 80th birthday This book includes twenty contributions from authors representing diverse multidisciplinary fields of scientific expertise and is focused on the extraordinary potential of peptides and peptidomimetics as a surging therapeutic modality and as tools for basic research and technology development      *Cumulated Index Medicus* ,1972      *Index Medicus* ,2004 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings      *Air Pollution Modelling* Syuichi Itahashi,2021-08-30 The air pollution problem inevitably accompanies our human activities Severe air pollution situations have been reported especially in emerging countries and satisfying the air quality standards fully remains an underlying issue Today modeling research is one of the more valuable approaches to understanding the behavior of air pollutants and is useful for regulation policy and decision making Such modeling applications range with regard to horizontal grid resolution from a few km local to hundreds of km regional to thousands of km global To foster our current scientific knowledge on modeling potentialities and limitations scientific research related to multi scale air pollution modeling is collected in this book      *Dietary Behavior and Physical Activity in Children and Adolescents* Antje Hebestreit,Leonie-Helen Bogl,2019-12-05 In recent years diet and lifestyle related disorders have become a major health threat in Europe and worldwide The

contributions in this monograph include 2 review articles and 19 original contributions from several countries that provide new information on the existing research elucidating important aspects of children's and adolescents' nutrition and lifestyle behavior. The data included in this Special Issue are from large epidemiological studies including several multicenter and multinational studies as well as datasets from surveillance initiatives. The topics of interest of this Special Issue include the co-occurrence of multiple health behaviors in children, the role of parenting and early feeding practices, dairy consumption in childhood, validity of dietary intake data, dietary supplement use in children as well as socioeconomic disparities and eating culture. The diverse articles in this Special Issue highlight the complexity and extent to which nutrition and physical activity behaviors may influence different health aspects of children and adolescents. As seen by the various findings and recommendations, not only is more work in this area required but the translation of this work to practice and policy is imperative if we are to address the challenges impacting the nutrition, physical activity and health of young populations.

*Marine Phenolics* Herminia Domínguez, José Ricardo Pérez-Correa, 2021-08-16 Phenolic compounds are an extremely diverse class of ubiquitous secondary metabolites produced by a variety of organisms playing different biological roles. They have numerous types of demonstrated bioactivities including antioxidant, antimicrobial, anti-inflammatory, antitumoral, immunomodulator, neuroprotective, cardioprotective and antidiabetic activities. Marine organisms produce a vast collection of unique phenolic structures, some of them not found in terrestrial habitats. Progress in different aspects is rapidly advancing and this Special Issue will provide updated information and recent studies on marine phenolics. Specially, this issue is focused on their chemical characterization, elucidation of their structures, evaluation of their biological properties and mechanisms of action, efficient extraction and purification technologies, development of value-added applications as well as formulation of novel products.

*Juvenile Onset Huntington's Disease* Peggy C. Nopoulos, 2021-01-14 The Special Issue Juvenile Onset Huntington's Disease highlights the growing interest in understanding the unique aspects of this ultra-rare disorder. After decades of research, gene therapy trials are underway for Adult Onset Huntington's Disease (AOHD). However, patients with Juvenile Onset Huntington's Disease (JOHD) are often excluded from these efforts, leaving many questions regarding its phenomenology. The current issue includes seven articles spanning work on the difficult emotional experiences of parents of children with JOHD, a review of the clinical manifestations of JOHD, behavioral issues in JOHD, CAG repeat and age of motor onset, autonomic nervous system dysfunction and abnormality in MRI, metabolic markers. Finally, a review of the therapeutic advances is included, highlighting future possibilities of clinical trials in JOHD subjects. The HD community, patients, family members at risk for HD, caregivers, health care professionals and scientists is keen on expanding our understanding of JOHD. In the flurry of research on AOHD, those with JOHD were seemingly left behind. The study of patients who are afflicted early in life with HD has become imperative with this Special Issue representing just the beginning of the required effort to address this urgent need.
