and plant extracts silicon endophytic fungi like mycorrhizal fungi and plant growth promoting rhizobacteria belonging to the genera Azospirillum Azotobacter and Rhizobium Other substances e g chitosan and other biopolymers and inorganic compounds can have biostimulant properties but their classification within the group of biostimulants is still under consideration Plant biostimulants are usually applied to high value crops mainly greenhouse crops fruit trees and vines open field crops flowers and ornamentals to sustainably increase yield and product quality The global biostimulant market is currently estimated at about 2 0 billion and is expected to reach 3 0 billion by 2021 at an annual growth rate of 13% A growing interest in plant biostimulants from industries and scientists was demonstrated by the high number of published peer reviewed articles conferences workshops and symposia in the past ten years This book compiles several original research articles technology reports methods opinions perspectives and invited reviews and mini reviews dissecting the biostimulatory action of these natural compounds and substances and beneficial microorganisms on crops grown under optimal and suboptimal growing conditions e g salinity drought nutrient deficiency and toxicity heavy metal contaminations waterlogging and adverse soil pH conditions Also included are contributions dealing with the effect as well as the molecular and physiological mechanisms of plant biostimulants on nutrient efficiency product quality and modulation of the microbial population both quantitatively and qualitatively In addition identification and understanding of the optimal method time rate of application and phenological stage for improving plant performance and resilience to stress as well as the best combinations of plant species cultivar environment management practices are also reported We strongly believe that high standard reflected in this compilation on the principles and practices of plant biostimulants will foster knowledge transfer among scientific communities industries and agronomists and will enable a better understanding of the mode of action and application procedures of biostimulants in different cropping systems

Epigenetic Modifications Associated with Abiotic and Biotic Stresses in Plants: An Implication for Understanding Plant Evolution Mahmoud W. Yaish, Heribert Hirt, Barbara Hohn, 2018-01-16 Alterations in gene expression are essential during growth and development phases and when plants are exposed to environmental challenges Stress conditions induce gene expression modifications which are associated with changes in the biochemical and physiological processes that help plants to avoid or reduce potential damage resulting from these stresses After exposure to stress surviving plants tend to flower earlier than normal and therefore transfer the accumulated epigenetic information to their progenies given that seeds where this information is stored are formed at a later stage of plant development DNA methylation is correlated with expression repression Likewise miRNA produced in the cell can reduce the transcript abundance or even prevent translation of mRNA However histone modulation such as histone acetylation methylation and ubiquitination can show distinct effects on gene expression These alterations can be inherited especially if the plants are consistently exposed to a particular environmental stress Retrotransposons and retroviruses are foreign movable DNA elements that play an important role in plant evolution Recent studies have shown that epigenetic

alterations control the movement and the expression of genes harbored within these elements These epigenetic modifications have an impact on the morphology and biotic and abiotic tolerance in the subsequent generations because they can be inherited through the transgenerational memory in plants Therefore epigenetic modifications including DNA methylation histone modifications and small RNA interference serve not only to alter gene expression but also may enhance the evolutionary process in eukaryotes In this E book original research and review articles that cover issues related to the role of DNA methylation histone modifications and small RNA in plant transgenerational epigenetic memory were published The knowledge published on this topic may add new insight on the involvement of epigenetic factors in natural selection and environmental adaptation This information may also help to generate a modeling system to study the epigenetic role in evolution

web mar 16 2018 coatings formulation chemists often differ in their approaches to paint formulation but a systematic approach can be helpful discover three starting points for how to formulate paint

[32 formulating principles springer](#) - May 02 2023

web a paint formulated to a performance specification for use by brush at low temperatures would be significantly different if only in solvent composition to one formulated to the same specification but to be spray applied at elevated temperatures

formulating fundamentals for coatings pci magazine - Apr 01 2023

web oct 1 2006 for example a typical spray application paint formulation may include fast medium and slow evaporating solvents the fast evaporating solvent provides a lower initial paint viscosity for easier application good atomization of the spray while allowing a higher viscosity after application after the fast evaporating solvent quickly

best practices for color formulation in paint 2021 11 09 pci mag - Dec 29 2022

web nov 9 2021 the paint and coating color formulation process requires standardizing conditions and procedures to match color standard efficiently color formulation involves defining requirements and methods while also identifying variables within the environment or production process that could influence the color formulation results

chapter 4 paint formulations globalspec - Jul 04 2023

web 4 1 1 the paint formula the formula lists the ingredients of the paint weismantel 1981 vehicle solvents pigmentation and additives the basic paint formulation and ingredients are listed in table 4 1 amounts are normally stated in units of weight for accuracy accurate metering equipment permits measuring the liquids in units

[4 paint formulations springer](#) - Jun 03 2023

web the basic paint formulation and ingredients are listed in table 4 1 amounts are normally stated in units of weight for accuracy 97 accurate metering equipment permits measuring the liquids in units of volume the significant relationships among the ingredients of the dried paint film are volume relationships not weight relationships

[chemical formulations for acrylic matt and acrylic gloss paints](#) - Jan 30 2023

web may 25 2022 an acrylic white matt emulsion paint is known to consist of 25 pigments 44 solvents 12 extender pigments 5 additives and 14 binders figure 1 2 table 1 chemical name molecular formula

starting point formulations byk - Oct 07 2023

web on these pages we offer starting point formulations for pigment concentrates for the use in decorative coatings general industrial coatings wood and furniture coatings and household industrial and institutional cleaners polishes and laundry detergents

coatings formulation de gruyter - Feb 28 2023

web apr 6 2017 developing paint recipes or paint formulations is an important part of paint and coatings technology

unfortunately paint recipes are listed in very few publications because they are closely guarded secrets of the paint and coatings industry
