Müller, 2019 In recent years tourism geographies have developed into a vibrant field of research at the intersection of geography and tourism studies The book presents a unique collection of individual research agendas aiming to inspire the pursuit of new avenues of research Although there have been arguments to apply post disciplinary perspectives within tourism research this book highlights the interest and potential of tourism geographers to contribute to a geographical tradition and influence the future content of geography as a discipline

Climate Change and the Role of Education Walter Leal Filho, Sarah L. Hemstock, 2019-11-28 This book offers insights into the educational dimensions of climate change and promotes measures to improve education in this context It is widely believed that education can play a key role in finding global solutions to many problems related to climate change Indeed education as a process not only helps young people to better understand and address the impact of global warming but also fosters better attitudes and behaviours to aid efforts towards mitigating climate change and adapting to a changing environment But despite the central importance of education in relation to climate change there is a paucity of publications on this theme Against this background the book focuses on the educational aspects of climate change and showcases examples of research projects and other initiatives aimed at educating various audiences It also provides a platform for reflections on the role education can play in fostering awareness on a changing climate Presenting a wide range of valuable lessons learned which can be adapted and replicated elsewhere the book appeals to educators and practitioners alike

Germany Olaf Kühne, Florian Weber, 2022-03-02 This book addresses the highly differentiated spatial social cultural and demographic structures of Germany with a particular focus on the reciprocal relations between different levels of spatial development The historical development of Germany serves as a background in order to provide context for the development of spatially relevant ideas and ideals whether in relation to

politics landscape or culture In this regard questions of divergence and convergence become highly salient The book makes the complexity of spatial and social developments in Germany comprehensible The neopragmatic approach adopted here allows bringing together different theoretical strands while providing a basis for independent regional geographic research at the same time Beginning with an overview of the physical structures of Germany which provides the material point of departure for the societal development of Germany key aspects of the German history are discussed Particular attention is paid to the reciprocal influence between material substrate and notions of landscape Here specific German trajectories of aesthetic and normative conceptions of landscape become clear A common theme throughout the book are questions of divergence and of efforts towards convergence which become evident when considering past and present economic political and demographic developments Efforts to tackle current challenges such as adapting to climate change and mitigating it or securing raw materials also become apparent The complexity of spatial processes in Germany is illustrated in case study regions dealing with the challenges of structural change in traditional industrial regions such as the Ruhr area or e g efforts of Berlin to position and find itself as the capital of a unified Germany Overall the book shows how theory driven regional geographic research can make spatiotemporal complexities tangible and comprehensible **The COLT Observation**
