deep space mission The Alien films launched a new generation of horror set in the great unknown inspiring filmmakers to take Earth bound franchises like Leprechaun and Friday the 13th into space This collection of new essays examines the space horror subgenre with a focus on such films as Paul W S Anderson s Event Horizon Duncan Jones Moon Mario Bava s Planet of the Vampires and John Carpenter s Ghosts of Mars Contributors discuss how filmmakers explored the concepts of the final girl survivor the uncanny valley the isolationism of space travel religion and supernatural phenomena Towards an Arithmetical Logic Yvon Gauthier,2015-09-24 This book offers an original contribution to the foundations of logic and mathematics and focuses on the internal logic of mathematical theories from arithmetic or number theory to algebraic geometry Arithmetical logic is the term used to refer to the internal logic of classical arithmetic here called Fermat Kronecker arithmetic and combines Fermat s method of infinite descent with Kronecker s general arithmetic of homogeneous polynomials The book also includes a treatment of theories in physics and mathematical physics to underscore the role of arithmetic from a constructivist viewpoint The scope of the work intertwines historical mathematical logical and philosophical dimensions in a unified critical perspective as such it will appeal to a broad readership from mathematicians to logicians to philosophers interested in foundational questions Researchers and graduate students in the fields of philosophy and mathematics will benefit from the author s critical approach to the foundations of logic and mathematics **Artifact Collective: an attempt to consciousness** Nick Stokes,2019-04-02 ARTIFACT COLLECTIVE is an attempt to create consciousness in a book You begin You are trapped in the dark under a great weight You cannot move His her their our your and my consciousnesses take shape through speculation into your condition Are you buried alive Why Are you alive Are you accelerating through space in a you shaped windowless vessel What is your shape Are you a flicker of light on the horizon of a black hole Where is she Has he lost all he loved Speculation via thought becomes reality Including historical scientific and found materials and images ARTIFACT COLLECTIVE is a fictional and non fictional exploration of quantum theory cosmology possible futures intellectual property interwoven presents the commons the individual and collective mind and the self ARTIFACT COLLECTIVE is a corpus It is an artifact ARTIFACT COLLECTIVE is licensed under a Creative Commons Attribution Share Alike 4 0 License CC BY SA 4 0 **Evolution of Black Holes in Anti-de Sitter Spacetime and the Firewall Controversy** Yen Chin Ong,2015-11-27 This thesis focuses on the recent firewall controversy surrounding evaporating black holes and shows that in the best understood example concerning electrically charged black holes with a flat event horizon in anti de Sitter AdS spacetime the firewall does not arise The firewall which surrounds a sufficiently old black hole threatens to develop into a huge crisis since it could occur even when spacetime curvature is small which contradicts general relativity However the end state for asymptotically flat black holes is ill understood since their curvature becomes unbounded This issue is avoided by working with flat charged black holes in AdS The presence of electrical charge is crucial since black holes inevitably pick up charges throughout their long lifetime These black holes always evolve toward

extremal limit and are then destroyed by quantum gravitational effects This happens sooner than the time required to decode Hawking radiation so that the firewall never sets in as conjectured by Harlow and Hayden Motivated by the information loss paradox the author also investigates the possibility that monster configurations might exist with an arbitrarily large interior bounded by a finite surface area Investigating such an object in AdS shows that in the best understood case such an object much like a firewall cannot exist
