Syngellakis,U. Probstl-Haider,F. Pineda,2018-07-23 This volume includes papers from the 8th International Conference on
Sustainable Tourism Today tourism is becoming accessible to a growing number of people and is an important component of
development not only in economic terms but also for knowledge and human welfare This collection of research aims to find
ways to protect the natural and cultural landscape through the development of new solutions which minimise the adverse
effects of tourism The phenomenon has many more advantages than disadvantages New forms of economic development and
increasing wealth of human societies depend on tourism Our knowledge of the world now includes a strong component due
to tourism Human welfare has physiological and psychological elements which tourism promotes both because of the
enjoyment of knowing new territories and increasing contacts with near or far away societies and cultures The tourism
industry has nevertheless given rise to some serious problems including social costs and ecological impacts Many ancient
local cultures have practically lost their identity Their societies have oriented their economy only to this industry Both the
natural and cultural rural or urban landscapes have also paid a high price for certain forms of tourism These problems will
persist if economic benefit is the only target leading to economic gains that eventually become ruinous It is also a grave error
to disregard the fact that visitors nowadays are increasingly demanding in cultural and environmental terms The Global
Change is a set of natural environmental changes that are strongly affected by technological and social developments Natural
changes are inherent in the Earth s ecosystem the ecosphere Also technological and social changes are inherent to mankind
the noosphere and are now becoming widespread Cities are growing rapidly and industry requires increasingly larger areas
Many traditional rural areas are being abandoned Tourism should also play an important role in this context Thus
interestingly many historic agricultural districts have maintained or even recovered their local population numbers through
intelligent strategies of tourism focused on nature and rural culture Natural landscapes and biodiversity are becoming
increasingly appreciated The tourism industry must be able to respond to these aspirations FCC Record United States.
