This book is relevant for language testers listening researchers and oral proficiency teachers in that it explores four broad
themes related to the assessment of L2 listening ability the use of authentic real world spoken texts the effects of different
speech varieties of listening inputs the use of audio visual texts and assessing listening as part of an interactive speaking
listening construct Each theme is introduced with a review of the relevant literature and then is examined through either two
or three empirical studies The notion of authenticity underlies each of these four themes By creating more authentic test
tasks that are similar to real world language tasks test developers can create listening assessments that not only more
effectively assess test takers communicative competence but can also have a positive washback effect on educational systems
