The Storytelling Animal How Stories Make Us Human:

The Storytelling Animal Jonathan Gottschall, 2012 A provocative scholar delivers the first book on the new science of storytelling the latest thinking on why we tell stories and what stories reveal about human nature **The Storytelling Animal** Jonathan Gottschall, 2020-06-11 Insightful draws from disparate corners of history and science to celebrate our compulsion to storify everything around us The New York Times Book Review Humans live in landscapes of make believe We spin fantasies We devour novels films and plays Even sporting events and criminal trials unfold as narratives Yet the world of story has remained an undiscovered and unmapped country It s easy to say that humans are wired for story but why In this delightful original book Jonathan Gottschall offers the first unified theory of storytelling He argues that stories help us navigate life s complex social problems just as flight simulators prepare pilots for difficult situations Storytelling has evolved like other behaviors to ensure our survival Drawing on the latest research in neuroscience psychology and evolutionary biology Gottschall tells us what it means to be a storytelling animal Did you know that the more absorbed you are in a story the more it changes your behavior That all children act out the same kinds of stories whether they grow up in a slum or a suburb That people who read more fiction are more empathetic Of course our story instinct has a darker side It makes us vulnerable to conspiracy theories advertisements and narratives about ourselves that are more truthy than true National myths can also be terribly dangerous Hitler s ambitions were partly fueled by a story But as Gottschall shows stories can also powerfully change the world for the better We know we are master shapers of story The Storytelling Animal finally reveals how stories shape us Lively San Francisco Chronicle Absorbing Minneapolis Star Tribune One of my favorite evolutionary psych writers always insightful and witty Steven Pinker The Art of Public Writing Zachary Michael Jack, 2020-10-28 Today s professionals recognize the need to elevate written communication beyond argument driven pedantry political polemic and obtuse pontification Whether the goal is to write the next serious work of best selling nonfiction to develop a platform as a public scholar or simply to craft clear and concise workplace communication The Art of Public Writing demystifies the process showing why it s not just nice but necessary to connect with those inside and outside one s area of expertise Drawing on a diverse set of examples ranging from Charles Darwin s On the Origin of Species to Steven Levitt s Freakonomics Zachary Michael Jack offers invaluable advice for researchers scholars and working professionals determined to help interpret field specific debates for wider audiences address complex issues in the public sphere and successfully engage audiences beyond the Corner Office and the Ivory Tower *Change* Jeffrey A. Screen Stories Carl R. Plantinga, 2018 The way we communicate with each other is vital to preserving the cultural ecology or wellbeing of a place and time Do we listen to each other Do we ask the right questions Do we speak about each other with respect or disdain The stories that we convey on screens or what author Carl Plantinga calls screen stories are one powerful and pervasive means by which we communicate with each other Screen Stories Emotion and the Ethics of Engagement argues that film and media studies needs to move toward an approach to ethics that is more appropriate for mass consumer culture and the lives of its citizens Primarily concerned with the relationship between media and viewers this book considers ethical criticism and the emotional power of screen stories that makes such criticism necessary The content we consume from television shows and movies to advertisements can significantly affect our welfare on a personal and societal level and thus this content is subject to praise and celebration or questioning and even condemnation The types of screen stories that circulate contribute to the cultural ecology of a time and place through shared attention they influence what individuals think and feel Plantinga develops a theory of the power of screen stories to affect both individuals and cultures asserting that we can better respond ethically to such media if we understand the sources of its

influence on us **What You Don't Know about Leadership, But Probably Should** Jeffrey A. Kottler, 2018 We live in a world of groups Almost every facet of daily existence whether sitting in meetings collaborating with coworkers attending classes or programs contributing to community or social events participating in family gatherings even enjoying coffee or meals with friends takes place in group contexts In addition everyone finds themselves in leadership positions at one time or another responsible for the welfare of others It is curious but nevertheless commonplace that counselors therapists teachers business leaders executives coaches and other helping professionals who have been specifically trained in group leadership often fail to apply their knowledge and skills to settings in which they might matter most The same practitioners who guide others may not be able or willing to put that background to work when they find themselves supervising peers leading meetings or even managing conflict at the dinner table Many if not most people experience required meetings and mandated group collaborations as tedious repetitive and often a waste of time that could be spent doing other things that feel far more productive
