

## Safety Precautions (cont'd)

## Bolster Adjustment

**Warning:** A winch and cable assembly support the bolster when the support pins are not in place. The following rules must be observed to prevent personal injury:

- To prevent accidental slippage, all bolster support pins must be in place and all cables slack before placing a work piece on the press bed or starting a pressing operation.
- When lowering the bolster, remove the work piece. Place one support pin all the way through each front and the back upright in the highest hole under the bolster that will not interfere with the new bolster position. Remove your hands from the support pins after the pins are in place.
- When raising the bolster, remove the work piece. Leave the support pins in place until the bolster is raised to its new position. Remove your hands from the support pins after the pins are in place.
- Inspect the entire length of the lifting cables at least every three months, and replace cables that appear frayed, worn, or crushed. The cables must run on the pulleys easily, and the pulleys must be free to turn. Correct cable maintenance helps prevent accidental cable breakage.

## Assembly

Remove banding from the press and shipping pallet, and remove all cartons. Stand the press upright. Refer to the parts list and follow these instructions during the assembly of hydraulic components and accessories.

1. Remove the lock ring and spring from the winch handle. Turn the handle 180°. Assemble the lock ring and spring again.
2. Refer to the parts list for the location of the pump mounting bracket. Mount the bracket using two hex hd. cap screws and nuts.
3. Place the pump on the bracket. Thread four machine screws through the bracket into the bottom of the pump reservoir.
4. Clean the threads on the hydraulic hose(s) and in the fittings. Assemble the hose(s) to the pump.
5. The gauge can be mounted to the pump's gauge port with a 45° elbow as shown in Figure 1. The gauge can also be mounted at the ram by using a tee adapter between the swivel fitting and hose. If you are using a double-acting ram, install the gauge in the top swivel fitting. See Figure 2. In either case, install a pipe plug in the pump's gauge port.
6. Thread the other end of the hose(s) into the swivel fitting(s) on the ram.

**Important:** Seal hydraulic connections with **Bakerseal** or one layer of **Teflon tape**. Apply the tape carefully to prevent it from being pinched by the fitting and broken off inside the pipe end. Loose pieces of tape could travel through the system and obstruct the flow of oil or cause jamming of precision-fit parts.

It promotes progesterone production by corpus luteal cells. It also functions in pregnancy to promote angiogenesis in uterine vasculature. It immunobland the invading placental tissue so it is not rejected by the maternal uterine tissues. It promotes the growth of the uterus in line with the growth of the fetus. It promotes the differentiation of growing cytotrophoblast cells. It promotes the quiescence of contractions in the uterine myometrium during the course of pregnancy and also has function in growth and development of fetal organs. The book describes the detailed biology, clinical chemistry and clinical perspectives of hCG and associated molecules and examines hCG, hyperglycosylated hCG and hCG free subunit 3 separate and independent molecules with totally sovereign physiological functions. It provides comprehensive information on hCG from basic science to clinical medicine. Written by specialists in the field.
