relationships among platforms were interactions In the twenty first century with the improvement of computer performance the platform identity has disappeared thus the relationship among platforms is highly competitive Since the crash of 1983 in the United States the Japanese game industry has one of the largest market shares in the world and has developed without being influenced by other countries It reached its peak in the late 1990s and then its relative position declined due to the growth of foreign markets and the failure of emerging markets such as online PC games Even today Japan s gaming industry holds a dominant position in the world but it is not the superpower it once was Since the beginning of the twenty first century game research has become active worldwide Among game researchers there is a large demand for research on games in Japan but there is still little dissemination of research in English The original version of this book published in Japan is highly regarded and received an award for excellence from the Society of Socio Informatics in 2017 **Wii Innovate.**
