**Other Voices** William L. Rivers, Everett E. Dennis, 2011-12-31 Conflicting journalistic voices that were raised in the past have become such a jumble that merely identifying them is difficult Dennis and Rivers define, categorize, present and examine the voices that contributed to what became known as the new media environment in the 1970s This new journalism came about as a result of dissatisfaction with existing values and standards of the early 1960s style of journalism The authors are comprehensive in their concerns as reflected in the national scope presented They cover developments in the major cities on both coasts in the Middle West and South in every major region of the United States Most of the research required travel and interviews all of it required reading almost endlessly and watching the video productions of journalists who built the structure of alternative television Dennis and Rivers offer a representative view of forms and media as well as the people who fashioned the new orientation The authors claim that the wrangling over objective and interpretative reporting misses the main point which is that neither is in close touch with reality The best objective report may cover all surfaces of an event the best interpretative report may explain all its meanings but both are bloodless a world away from the experience Color, flavor, atmosphere, the ultimate human meaning all these the new journalists contend are far beyond the reach of traditional models of journalism This is one of the central reasons for the emergence of different forms and practices in our time This volume will help younger scholars understand the sources of quasi-journalistic practices extant today including blogging and electronic only publications

**The Washington Reporters** Stephen Hess,2010-12-01 In the vast literature on the way democratic governments work the role of the press is often overlooked Yet the press no less than the formal branches of government is a public policy institution and deserves to be included in explanations of the governmental process In The Washington Reporters Stephen Hess focuses on those who cover the U S government for the American commercial news media His book is based on interviews with reporters and editors and on responses to questionnaires from nearly half of the over 1 200 American reporters in Washington Analysis of these responses and comparison with the content and placement of over 2 000 of these reporters news stories permit an unusual and sometimes startling perspective on Washington newswork Mr Hess demonstrates for instance how information in the news regularly comes from the legislative branch of the government despite the greater number of stories on the presidency and he shows that Washington news dominates the front pages of daily newspapers across the country no matter how little may be going on in the nation s capital The author concludes that Washington news gathering fragments media power while at the same time it shifts decisions on what is news and how it should be covered to the reporters The import of this impression is that reporters are not simply passing along information they are choosing within certain limits what most people will know about government The freedom given and assumed by these news workers affects the shape of national affairs

Book cover **Exporting Press Freedom** Craig LaMay,2017-07-12 International media assistance is a small but important form of international democracy promotion aid Media assistance boomed after the 1989 transitions in Central Europe but now flows to virtually all regions of the world Today the media assistance industry is focused on the problem of sustainability How are free and independent public affairs media supposed to maintain their editorial mission while facing hostile political

systems or the demands of the consumer marketplace Many media in developing countries have been or are grant dependent When grants are exhausted or withdrawn media that were funded to further democratic consolidation typically wither and die Some become mere grant chasers Others abandon public service to the demands of market competition or political patronage As a result governmental and non governmental grant makers now emphasize the need for sustainability in considering grants in the media sector Many grant recipients have grown frustrated sometimes bitter and have sought to take a much more active role in the way assistance programs are put together Just how is sustainability to be achieved while also ensuring a public service editorial mission Exporting Press Freedom examines the history and practice of media assistance and argues that the dilemma of media independence and sustainability is best understood as an economic problem rather than one of poor editorial standards or lack of will It includes profiles of news and public affairs media in developing and democratizing countries and also of two non governmental organizations that have pioneered the use of low interest loans in media assistance These profiles exemplify strategic and entrepreneurial approaches to developing and supporting public service media Such approaches may be of use not only in the developing world but in the consolidated Western democracies as well where concern has grown about poor journalistic performance and its consequences f The Story of "Me" Marjorie Worthington,2018-11-01 Autofiction or works in which the eponymous author appears as a fictionalized character represents a significant trend in postwar American literature when it proliferated to become a kind of postmodern cliché The Story of Me charts the history and development of this genre analyzing its narratological effects and discussing its cultural implications By tracing autofiction's conceptual issues through case studies and an array of texts Marjorie Worthington sheds light on a number of issues for postwar American writing the maleness of the postmodern canon and anxieties created by the supposed waning of male privilege the relationship between celebrity and authorship the influence of theory the angst stemming from claims of the death of the author and the rise of memoir culture Worthington constructs and contextualizes a bridge between the French literary context from which the term originated and the rise of autofiction among various American literary movements from modernism to New Criticism to New Journalism The Story of Me demonstrates that the burgeoning of autofiction serves as a barometer of American literature from modernist authorial effacement to postmodern literary self consciousness Investigative Reporting in den USA Manfred Redelfs,2013-03-13 Investigative Reporting ist ein Leitbild des US Journalismus Die gründliche Recherche die Missetände aufdeckt gilt nicht erst seit der Watergate Affäre als zentrale journalistische Leistung Der Band untersucht warum sich Investigative Reporting in den USA zur eigenen journalistischen Spezialisierung entwickelt hat und wie diese Form der Machtkontrolle heute bei Zeitungen Zeitschriften und Fernsehen betrieben wird Faktoren der politischen Kultur werden dabei ebenso beleuchtet wie ökonomische rechtliche und professionelle Aspekte Durch Portraits von Rechercheabteilungen und bei der Washington Post und dem Fernsehmagazin 60 Minutes vermittelt diese Studie erstmals ein umfassendes und anschauliches Bild des
