Technologies for Prospecting, Extraction, and Utilization of Space Resources Paul Zabel, Philipp Reiss, Angel Abbud-Madrid, Beth Lomax, Florian Kehl, Valentin T. Bickel, Hendrik Kolvenbach, Philip Arm ,Gabriela Ligeza, 2024-11-18 Sustainable exploration of the solar system requires a large amount of material and propellant to be transported out of Earth s gravity well and onwards to their destination Despite recent advances in lowering launch costs transferring material from Earth to space is still very costly It still amounts to several thousand to tens of thousands of Euros per kilogram to low earth orbit and transportation to the Moon and Mars even a multiple of that There is an abundance of resources in our solar system that can be utilized to reduce the material required to be launched from Earth significantly Among these resources are water ice hydrates metals regolith rare earth elements chemical compounds volatiles and rare isotopes Utilizing these space resources would enable e g consumable and propellant production in space manufacturing or

the construction of large structures which would otherwise be very expensive or not possible at all with material launched from Earth Lunar regolith for example contains iron and titanium that could be used to produce spacecraft components or structural elements for a lunar base while oxygen released from oxide minerals could be used for respiration or as a propellant In addition water ice could be extracted from regolith and used for consumption or agricultural applications Although there have been numerous missions to the Moon there are still a lot of unknowns concerning its surface making it difficult to know where to look for resources and how to extract them

The Prospector's Wife John Drabble, Aileen Mary Eleanor Drabble was a young woman just out of school when in 1911 she immigrated to Canada along with her family They left the comfort of upper class British society to start again in Vancouver then a booming city on the edge of the Canadian frontier Impetuous and headstrong Aileen soon fell in love with a gold prospector Together they embarked on a 40 year adventure marked by both great elation and deep adversity Whether in Vancouver or in the wilderness of BC's interior Aileen known as Mimi to her family left an indelible impression on nearly everyone she met More than 30 years after her death those who knew her still tell stories about her Though never famous she was very much a pioneer whose life in many ways paralleled the journey of her adopted country from a British colony to an independent nation *Oil and Gas Reservoir Prospecting and Exploration* Vladimir L. Trofimov, Fanil F. Khaziev, Alisa V. Trofimova, 2022-05-31 This book discusses topical issues of detailed seismic data interpretation using high resolution seismic HRS techniques which are based on the numerical method developed by the authors for solving the inverse dynamic seismic problem IDSP The authors highlight the range of issues related to the development and application of HRS Geo technologies on a variety of seismic data and analyze a significant amount of practical material in various seismic and geological conditions This analysis allows for the accurate estimation of geological indicators in sediments that are most important for the prediction and exploration of oil and gas deposits including lithological composition reservoir properties and the nature and degree of reservoir rock saturation with fluids The book is intended for professionals involved in seismic data processing and geological interpretation students of geophysical and geological specialties graduate students of these specializations *Horizons of Phenomenology* Jeff Yoshimi, Philip Walsh, Patrick Londen, 2023-04-11 This is an open access book which explores phenomenology as both an exceptionally diverse movement in philosophy as well as an active research method that crosses disciplinary boundaries The volume brings together lively overviews of major areas and schools of phenomenology as well as the most recent applications across a range of fields The first part reviews the state of the art in various areas of contemporary phenomenology including several distinct schools of Husserl and Heidegger scholarship as well as approaches derived from Merleau Ponty de Beauvoir Fanon and others An innovative quantitative analysis of citation networks provides rich visualizations of the field as a whole The second part showcases phenomenology as a living discipline that can advance research in other areas While some areas of interaction between phenomenology and other disciplines are by now well established e.g cognitive science this volume

sheds light on newer areas of application The goal is to move beyond discussions of philosophical method and highlight scholars who are actually doing phenomenology in a variety of areas including Embodiment and questions of gender race and identity The arts visual art literature architecture and Archaeology and anthropology This volume offers a concise introduction to cutting edge phenomenological research and is suitable for both students and specialists **The Myths of**

Regional Innovation Rider W. Foley, 2025-08-08 Billions of dollars Euros yen and yuan in public funds are spent annually to promote innovation in metropolitan regions attempting to transform the economy by attracting technology based companies and supporting small startups to secure high paying jobs The impacts of those investments are typically assessed in terms of economic growth venture capital and jobs Regional innovation is assessed with financial measures that do not account for the distribution of wealth nor do they evaluate if innovation addresses broader sustainability concerns This book draws on evidence from 144 interviews with civic leaders in three urban regions Atlanta Phoenix and the Twin Cities to illuminate three commonly accepted but flawed myths about innovation that misdirect policymakers and civic leaders and perpetuate the idea that innovation is solely about economic growth This book offers evidence of the social networks labor divisions and conditions enabling innovation to dispel those three myths and propose more nuanced and realistic ways of thinking about regional innovation This book is not an argument against innovation Rather it critically reflects upon investments in innovation and showcases laudable efforts to create a livable and sustainable city The book offers a novel method to assess the processes and outcomes of innovation in a manner that can complement economic approaches The author lays bare the human values that motivate city staff corporate officers and academic partners and highlights the efforts of organizations that often remain underappreciated The evidence presented in this book puts forward a means to assess if and how innovation contributes to an equitable and sustainable future or if it perpetuates injustices and economic stratification The Myths of Regional Innovation will appeal to scholars across broad fields including innovation studies technology management entrepreneurship economic development and public policy Medieval Spaces in Comics Elizabeth Allyn Woock, 2024-11-12

This book proposes a conceptual framework for analyzing and discussing narrative space in comics Building on Mieke Bal's phenomenological approach to cultural analysis 2002 Gaston Bachelard's Poetics of Space 1996 and Geraint D Arcy's use of the *mise en sc ne* to describe space in the comics format 2020 this book layers in a nuanced approach to the depiction of medieval environments through affect theory and poetics to interrogate the staging of ideas which are associated with the medieval period Considering the action setting and story as well as affect atmosphere and mood medieval space is contextualized as an ethically complex poetic image This book also explores the communicative possibilities of the comics format and seeks to show rather than just tell the methodologies of space in comics based research through illustrating key sections of the text *Advances in natural product chemistry: Yunnan university 100th anniversary* Wen Chen, Jian-Wei

Dong, Ana Figueiras, Siva S. Panda, 2023-10-25 **Bio-prospecting of Novel Microbial Bioactive Compounds for**

Sustainable Development Kartika Sharma, 2025-04-26 This book discusses current developments and upcoming trends in the microbial synthesis of various bioactive compounds from waste product which have a very good market worldwide The extraction of biologically active compounds from microorganisms is still essential for the creation of novel pharmaceuticals and agricultural chemicals and has underpinned their application as drugs and functional food ingredients The demand of pharmaceuticals nutraceuticals and agrochemicals is rising globally for the multi billion dollar market of human disease prevention and treatment However the limitations and issues associated with the extraction of these bioactive compounds from natural resources such as plants animals or fungi limit the large scale use of pharmaceuticals nutraceuticals and agrochemicals The microbial production of agrochemicals nutraceuticals and pharmaceuticals by utilizing waste product is now thought to be an environmentally benign process The major goal of this book is to draw attention to excellent original research and review articles that contain cutting edge characterization techniques and novel bioactive chemicals production that make important contributions to the field with many prospective applications In this book the potential for using microbial bioactive compounds which have positive health effects in their entirety is highlighted This book is written by eminent scientists from around the world and seasoned researchers thoroughly discusses current developments and patterns in the microbial synthesis of bioactive compounds Academicians scientists researchers graduate and post graduate students who work in the highly dynamic and competitive fields of pharmaceuticals nutraceuticals and agrochemicals discovery will find this book to be ideal
