## **Super Teacher Math:**

**The Superteacher Project** Gordon Korman, 2023-02-07 It's The Unteachables meets I Robot in another funny middle school tale from Gordon Korman. It's the start of a new school year and Oliver is looking forward to a seventh grade year full of spitballs, jokes and pranks with his friend Nathan. And their new homeroom teacher Mr Aidact looks like a prime target. He's an odd duck with a weird stilted vocabulary, an unusual way of looking at things and a strangely old student teacher constantly in tow. He also has a seemingly superhuman ability to detect and defuse almost every one of Oliver's schemes. But that's not all of it. Mr Aidact seems to be teaching pretty much every subject. He's willing to take over jobs no other teacher will like supervising detention and coaching the field hockey team. Oliver and Nathan are determined to find out what is up with this guy. What they uncover is out of this world. Mr Aidact is in fact superhuman. He's an android, a secret project of the Department of Education. And when the secret leaks out, the school and the PTA are in an uproar and calls for his deactivation are loud and clear. Can Oliver and his friends turn this plan around and save the teacher they've grown to love and appreciate?

**Master Mathematics Teachers** Zhenzhen Miao, Christian Bokhove, David Reynolds, 2023-08-21 This practical guide invites teachers to take a journey towards masterly mathematics teaching using the experiences and lessons learnt across five Chinese provinces: Anhui, Beijing, Jiangsu, Jiangxi and Tianjin. On this journey you will gain a thorough understanding of 1 the quality and characteristics of master mathematics teachers teaching, 2 the quality of mathematics learning they have nurtured amongst their students in affective, metacognitive and cognitive dimensions, and 3 the teaching learning mechanisms that underpin excellent performance in the three dimensions. Alongside the quantitative and qualitative evidence on educational excellence, you will also delve deep into the trajectories and processes of professional development that generate professional excellence amongst master mathematics teachers and their peers within and across primary schools up and down China. Building on data collected with 70 master mathematics teachers and 3 178 students and from teaching research events at the school, municipal, provincial and national levels, the Master Mathematics Teachers MasterMT project is to date the first that has looked at the legendary tribe of master mathematics teachers in China at such a large scale and with such breadth and depth. The book offers invaluable insights for any teacher or teacher educator who wants to improve mathematics teaching and learning and generate educational and professional excellence in primary schools and beyond. More information on the Master Mathematics Teachers MasterMT project can be accessed at <https://mastermt.org>.

**Opening the Research Text** Elizabeth de Freitas, Kathleen Nolan, 2007-12-19 In this chapter we interrogate the debate between mathematicians and mathematics educators This debate is widely recognized in the United States for instance where the term math wars is often used in reference to the heated disagreements between mathematicians and mathematics educators Such recognition might suggest that this topic itself has relevance both for the academy and for educational policy pertaining to mathematics education We propose to locate this debate unavoidably whenever and wherever mathematics education is written Our aim is to show how the debate itself gives rise to the inscription mathematics education Indeed we contend that mathematics education cannot be defined outside of or prior to the debate for it is precisely through the debate that it is constituted as a domain for deliberation The debate is more primordial than any epistemic domain implied by it In other words we argue that mathematics and mathematics education do not exist epistemically prior to the debate In order to engage this issue we consider a transcription of a panel

debate 2 between mathematicians and mathematics educators held in Brazil in 1998 There is at least a double meaning for the word debate it may mean a meeting having a beginning and an end well localized in space and time and with a specific proposal or focus as in the following sentence I am going to see on TV the debate between Bush and Blair tomorrow at 5 pm
