Retooling Rosalind Williams, 2003-08-11 A humanistic account of the changing role of technology in society by a historian and a former Dean of Students and Undergraduate Education at MIT When Warren Kendall Lewis left Spring Garden Farm in Delaware in 1901 to enter MIT he had no idea that he was becoming part of a profession that would bring untold good to his country but would also contribute to the death of his family's farm In this book written a century later Professor Lewis's granddaughter a cultural historian who has served in the administration of MIT uses her grandfather's and her own experience to make sense of the rapidly changing role of technology in contemporary life Rosalind Williams served as Dean of Students and Undergraduate Education at MIT from 1995 through 2000 From this vantage point she watched a wave of changes some planned and some unexpected transform many aspects of social and working life from how students are taught to how research and accounting are done at this major site of technological innovation In *Retooling* she uses this

local knowledge to draw more general insights into contemporary society's obsession with technology. Today technology-driven change defines human desires, anxieties, memories, imagination, and experiences of time and space in unprecedented ways. But technology, and specifically information technology, does not simply influence culture and society; it is itself inherently cultural and social. If there is to be any reconciliation between technological change and community, Williams argues, it will come from connecting technological and social innovation, a connection demonstrated in the history that unfolds in this absorbing book.

Emotional Competence Dagmar Rudel-Steinbauer, 2017-07-13. What is the use to reach the moon if we cannot overcome the chasm that separates us from ourselves? This is the most important expedition, and without it all others are useless. Antoine de Saint-Exupéry, French writer and pilot, 1900-1944. To recognize emotions and to keep a respectful manner with them is a skill of every single human which should not be underestimated. Emotional competence plays an important, maybe even the most significant, role on the way to personal development. Like Antoine de Saint-Exupéry already put it to the point: Psychologists talk about humans to be threatened by alienation from themselves due to a lack of self-perception and an overload of external stimuli. The inner world, the world of emotions and needs, runs the risk of being neglected. Futurologists think that values like empathy and emotions will be more requested than ever henceforward. Psychologists realize that the availability of emotional competence is the key which unlocks the door on the way to all other social competences. In this book you will learn about the importance of emotional competence for your personal, professional, and private success. It is the ideal manual for everybody who is ready to start out for one's own fountain of success. You get answers to following questions: What is emotional competence exactly? How can emotional competence promote personal, professional, and private success? Which possibilities and methods exist to promote and develop emotional competence for oneself?

The Bookman, 1915. Colour, 1914. The periodical's purpose was to report on contemporary developments in painting from the British Isles and elsewhere; more importantly, each issue contained high-quality colour reproductions of examples of various artists' work.
