Leisure and the Changing City 1870 - 1914 (Routledge Revivals) Helen Meller, 2013-09-13 By the late nineteenth century the city had become the dominant social environment of Britain with the majority of the population living in large cities often with over 100 000 inhabitants The central concern of this book first published in 1976 is to assess how successful the late Victorians were in creating a stimulating social environment whilst these developing cities were being transformed into modern industrial and commercial centres Using Bristol as a case study Helen Meller analyses the new relationships brought about by mass urbanisation between city and citizen environment and society The book considers a variety of important features of the Victorian city in particular the development of the main cultural institutions the provision of leisure facilities by voluntary societies and the expansion of activities such as music sport and commercial entertainment Comparative examples are drawn from other cities which illustrate the common social and cultural values of an urbanised nation This is a very interesting title of great relevance to students and academics of town planning Victorian society and the history and development of the modern city

A Hundred English Working-Class Lives, 1900-1945 Rebecca Ball, 2024-07-11 Stanley Rice born in London in 1905

began his autobiography by stating that his life was an ordinary average life with all its ups and downs Stanley may have described his life as ordinary and yet he lived through a period of rapid social change including two world wars Despite this Stanley assumed that his life story would be of little interest to most readers as he had not achieved great fame or any notable accolades This book argues that this is exactly why historians should focus on such life stories as there is much to be gained by focusing on memories of ordinary average lives as they can expand our knowledge of the past often revealing firsthand experiences that have been excluded from the historical record This book does not intend to be a general social history of the working class Rather it is a work of memory drawing upon a microhistory methodology to examine how a sample of one hundred working class autobiographers remembered and wrote about living through years that were punctuated by two worldwide conflicts and a global economic depression

Working Classes Patricia Midgley, 2012-12-21 Contrary to our perception of the centrality of the churches in English life in
 the nineteenth century the disappointing results of the 1851 Religious Census led religious leaders to seek a variety of ways
 to increase religious allegiance as the century progressed The apparent apathy and lack of interest in formal religion on the
 part of the working classes was particularly galling and the various denominations tried hard to attract them through
 evangelical missions as well as social and charitable ventures which sometimes competed with religious concerns to the

latter's detriment This book traces the motivations concerns and efforts of the churches particularly in the period between 1870 and 1920 and the ambivalent responses of ordinary people The Education Act of 1870 led to the churches losing their hold on the education of the young a consequence foreseen by many church leaders but unable to be prevented By 1920 it was apparent that the churches optimism regarding an increased role with a war weary population would not be fulfilled The focus is on the city of Leeds representative of the industrialised urban areas with burgeoning populations which proved to be such a challenge to the churches at the same time stimulating them to ever greater efforts
