To A Higher Degree: An Unorthodox Journey to Becoming a Lawyer David Willms, *First Thing We Do, Let's Deregulate All the Lawyers* Clifford Winston, Robert W. Crandall, Vikram Maheshri, 2011-08-01 Not many Americans think of the legal profession as a monopoly but it is Abraham Lincoln who practiced law for nearly twenty five years would likely not have been allowed to practice today Without a law degree from an American Bar Association sanctioned institution a would be lawyer is allowed to practice law in only a few states ABA regulations also prevent even licensed lawyers who work for firms that are not owned and managed by lawyers from providing legal services At the same time a slate of government policies has increased the demand for lawyers services Basic economics suggests that those entry barriers and restrictions combined with government induced demand for lawyers will continue to drive the price of legal services even higher Clifford Winston Robert Crandall and Vikram Maheshri argue that these increased costs cannot be economically justified They create significant social costs hamper innovation misallocate the nation s labor resources and create socially perverse incentives In the end attorneys support inefficient policies that preserve and enhance their own wealth to the detriment of the general population To fix this situation the authors propose a novel solution deregulation of the legal profession Lowering the barriers to entry will force lawyers to compete more intensely with each other and to face competition from nonlawyers and firms that are not owned and managed by lawyers The book provides a much needed analysis of why legal costs are so high and how they can be reduced without sacrificing the quality of legal services

Divergent Paths Richard A. Posner, 2016-01-04 Judges and legal scholars talk past one another if they have any conversation at all Academics criticize judicial decisions in theoretical terms which leads many judges to dismiss academic discourse as divorced from reality Richard Posner reflects on the causes and consequences of this widening gap and what can be done to close it *ABA Journal* , 1996-04 The ABA Journal serves the legal profession Qualified recipients are lawyers and judges law students law librarians and associate members of the American Bar Association *Impact of Global*

University Ranking Systems on Developing Countries Onyancha, Omwoyo Bosire, Tella, Adeyinka, 2023-06-01 The emotive discourses on the subject of university rankings are directly linked to the effect of such rankings on the performance of universities throughout the world. It has been observed that the top ranked universities attract major financial commitments from the industry, the best students, quality researchers, and a wide range of other quality endowments such as equipment, libraries, and laboratories. It is not surprising that the ranking of universities has gained popularity and become a significant factor shaping not only the reputation of universities but also the performance of said institutions around the world, including the developing countries. *Impact of Global University Ranking Systems on Developing Countries* presents a collection of perspectives from scholars and other stakeholders on the impact of the global ranking systems on developing countries. The book is an additional resource for discussion and discourse as far as the global university ranking systems are concerned and opens new frontiers for further research. Covering key topics such as assessment ethics and academic freedom, this premier reference source is ideal for administrators, policymakers, researchers, scholars, academicians, practitioners, instructors, and students.

Reproducing Racism Daria Roithmayr, 2014-01-20 Argues that racial inequality reproduces itself automatically over time because early unfair advantage for whites has paved the way for continuing advantage. This book is designed to change the way we think about racial inequality. Long after the passage of civil rights laws, blacks and Latinos possess barely a nickel of wealth for every dollar that whites have. Why have we made so little progress? Legal scholar Daria Roithmayr provocatively argues that racial inequality lives on because white advantage functions as a powerful self-reinforcing monopoly, reproducing itself automatically from generation to generation even in the absence of intentional discrimination. Drawing on work in antitrust law and a range of other disciplines, Roithmayr brilliantly compares the dynamics of white advantage to the unfair tactics of giants like AT T and Microsoft. With penetrating insight, Roithmayr locates the engine of white monopoly in positive feedback loops that connect the dramatic disparity of Jim Crow to modern racial gaps in jobs, housing, and education. Wealthy white neighborhoods fund public schools that then turn out wealthy white neighbors. Whites with lucrative jobs informally refer their friends who refer their friends, and so on. Roithmayr concludes that racial inequality might now be locked in place unless policymakers immediately take drastic steps to dismantle this oppressive system.
