 based in the Asia Pacific region in Kuala Lumpur in October 2005 and is applicable to all sectors of the bridge engineering
 community BACKGROUND KNOWLEDGE AND FUTURE PERFORMANCE The Institution of Civil Engineers has collaborated
 with internationally renowned bridge engineers to organise three successful conferences to celebrate the enormous
 achievements made in the field of bridge engineering in recent years As a discipline bridge engineering not only requires
 knowledge and experience of bridge design and construction techniques but must also deal with increasing challenges posed
 by the need to maintain the long term performance of structures throughout an extended service life In many parts of the
 world natural phenomena such as seismic events can cause significant damage to force major repairs or reconstruction
 Therefore it is appropriate that the first plenary session of this conference is entitled Engineering for Seismic Performance
 READERSHIP This compilation of papers will benefit practising civil and structural engineers in consulting firms and
 government agencies bridge contractors research institutes universities and colleges In short it is of importance to all
 engineers involved in any aspect of the design construction and repair maintenance and refurbishment of bridges **Bridge**
