Jha,Robin Bloch,Jessica Lamond,2012-02-01 Urban flooding is an increasing challenge today to the expanding cities and towns of developing countries This Handbook is a state of the art user friendly operational guide that shows decision makers and specialists how to effectively manage the risk of floods in rapidly urbanizing settings and within the context of a changing climate *Flood Recovery, Innovation and Response III* D. Proverbs,2012 Flooding claims many lives worldwide each year In addition many more lives are affected by homelessness disease and crop failures as a result of floods destructiveness The number of recent flood events coupled with climate change predictions and urban development suggest that these statistics are likely to worsen in the future Flooding in populated areas can cause substantial property damage as well as threaten human life Apart from the obvious physical damage to buildings contents and loss of life there other more indirect losses that are often overlooked These intangible impacts are generally associated with disruption to normal life as well as longer term health issues including stress related illness The conference papers cover the following topics Flood risk analysis Flood risk management Urban flood management Flood forecasting Risk assessment and decision making Flood case studies Community resilience to flooding Energy preparedness and response Critical infrastructure protection Flood consequence assessment **Flood Handbook** Saeid Eslamian,Faezeh A. Eslamian,2022-04-18 Floods are difficult to prevent but can be managed in order to reduce their environmental social cultural and economic impacts Flooding poses a serious threat to life and property and therefore it s very important that flood risks be taken into account during any planning process This handbook presents different aspects of flooding in the context of a changing climate and across various geographical locations Written by experts from around the world it examines flooding in various climates and landscapes taking into account environmental ecological hydrological and geomorphic factors and considers urban agriculture rangeland forest coastal and desert areas Features Presents the main principles and applications of the science of floods including engineering and technology natural science as well as sociological implications Examines flooding in various climates and diverse landscapes taking into account environmental ecological hydrological and geomorphic factors Considers floods in urban agriculture rangeland forest coastal and desert areas Covers flood control structures as well as preparedness and response methods Written in a global context by contributors from around the world *Resilience and Urban Governance* Katarína Svitková,2021-07-22 This book challenges the concept of urban resilience by exploring its impact and limitations in three cities Resilience has become a buzzword in science industry and policy and this volume offers a fresh perspective on

urban resilience as a regulatory and constitutive principle of governance in cities Cities constitute an extremely relevant playground for resilience as they are exposed to various disruptions from natural disasters and pandemics to political conflicts and terrorism This book traces the evolution of urban resilience from international development organizations to local governments and communities It explores how this concept was adopted and mobilized by different actors for different purposes and analyses the resulting resilience momentum in Barcelona San Francisco and Santiago The book outlines the extent to which resilience has become a universal policy tool and a desired end state despite its clearly problematic definition It also contributes to the discussion about contemporary governance safety and security in times when their very nature and feasibility are being questioned This book will be of much interest to students of resilience studies urban studies development studies human geography and international relations

Renewing Local Planning to Face Climate Change in the Tropics Maurizio Tiepolo, Alessandro Pezzoli, Vieri Tarchiani, 2017-07-05 This book is open access under a CC BY 4.0 license This book aims to inspire decision makers and practitioners to change their approach to climate planning in the tropics through the application of modern technologies for characterizing local climate and tracking vulnerability and risk and using decision making tools Drawing on 16 case studies conducted mainly in the Caribbean Central America Western and Eastern Africa and South East Asia it is shown how successful integration of traditional and modern knowledge can enhance disaster risk reduction and adaptation to climate change in the tropics The case studies encompass both rural and urban settings and cover different scales rural communities cities and regions In addition the book looks to the future of planning by addressing topics of major importance including residual risk integration in local development plans damage insurance and the potential role of climate vulnerability reduction credits In many regions of the tropics climate planning is growing but has still very low quality This book identifies the weaknesses and proposes effective solutions

Building Urban Resilience Abhas K. Jha, Todd W. Miner, Zuzana Stanton-Geddes, 2013-03-01 This handbook is a resource for enhancing disaster resilience in urban areas It summarizes the guiding principles tools and practices in key economic sectors that can facilitate incorporation of resilience concepts into decisions about infrastructure investments and urban management that are integral to reducing disaster and climate risks
