Qualitative Economics Woodrow W. Clark II, Michael Fast, 2019-10-08 This book provides a new paradigm of economics that is called Qualitative Economics The authors take an approach to economics that is entirely different from the established neo classical economics paradigm Arguing that the basis of neo classical economic theory with its focus on perfect information in a balanced equilibrium system of supply and demand is fundamentally flawed the authors propose an inclusive philosophical and scientific perspective to explain economic structures and activities and how best to understand the dynamics of economics Furthermore the authors argue that a qualitative approach allows for greater understanding of not only the actors actions and situations in economics but also defines the context in which the more traditional quantitative and statistical methods are applied The book includes case studies to further illustrate the applications of qualitative economics Challenging orthodox paradigms and schools of economic thought the book proposes a new way of looking at economics and as such will be of use to researchers and students of economics business social sciences and the sciences as well as think tanks and advocacy groups interested in heterodox economics

Comparative Economic Systems Steven Rosefielde, 2015-04-30 Comparative Economic Systems Culture Wealth and Power in the 21st Century explains how culture in various guises modifies the standard rules of economic engagement creating systems that differ markedly from those predicted by the theory of general market competition This analysis is grounded in established principles but also assumes that individual utility seeking may be culturally determined that political goals may take precedence over public well being and that business misconduct may be socially detrimental

Incomplete Streets

Stephen Zavestoski, Julian Agyeman, 2014-08-27 The Complete Streets concept and movement in urban planning and policy has been hailed by many as a revolution that aims to challenge the auto normative paradigm by reversing the broader effects of an urban form shaped by the logic of keeping automobiles moving By enabling safe access for all users Complete Streets promise to make cities more walkable and livable and at the same time more sustainable This book problematizes the Complete Streets concept by suggesting that streets should not be thought of as merely physical spaces but as symbolic and social spaces When important social and symbolic narratives are missing from the discourse and practice of Complete Streets what actually results are incomplete streets The volume questions whether the ways in which complete streets narratives policies plans and efforts are envisioned and implemented might be systematically reproducing many of the urban spatial and social inequalities and injustices that have characterized cities for the last century or more From critiques of a mobility bias

rooted in the neoliberal foundations of the Complete Streets concept to concerns about resulting environmental gentrification the chapters in Incomplete Streets variously call for planning processes that give voice to the historically marginalized and more broadly that approach streets as dynamic fluid and public social places This interdisciplinary book is aimed at students researchers and professionals in the fields of urban geography environmental studies urban planning and policy transportation planning and urban sociology

The Right Kind of Revolution Michael E. Latham, 2011-01-15 After World War II a powerful conviction took hold among American intellectuals and policymakers that the United States could profoundly accelerate and ultimately direct the development of the decolonizing world serving as a modernizing force around the globe By accelerating economic growth promoting agricultural expansion and encouraging the rise of enlightened elites they hoped to link development with security preventing revolutions and rapidly creating liberal capitalist states In *The Right Kind of Revolution* Michael E Latham explores the role of modernization and development in U S foreign policy from the early Cold War through the present The modernization project rarely went as its architects anticipated Nationalist leaders in postcolonial states such as India Ghana and Egypt pursued their own independent visions of development Attempts to promote technological solutions to development problems also created unintended consequences by increasing inequality damaging the environment and supporting coercive social policies In countries such as Guatemala South Vietnam and Iran U S officials and policymakers turned to modernization as a means of counterinsurgency and control ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s Since the end of the Cold War the faith in modernization as a panacea has reemerged The idea of a global New Deal however has been replaced by a

Education, Recession and the World Village Frederick M. Wirt,Grant Harman,2025-08-01 First published in 1986 Education Recession and the World Village explores the effects of world economic recession on the educational arrangements of eight modern nations including Hong Kong Australia US Nigeria UK and China and just how nations adjust their educational systems to meet these pressures The idea that the world is a global village where what affects the fabric of one country affects that of all the others is particularly stressed This book will be of interest to students and researchers of education *Transition Scenarios* David P. Rapkin,William R. Thompson,2013-09-24 China s rising status in the global economy alongside recent economic stagnation in Europe and the United States has led to considerable speculation that we are in the early stages of a transition in power relations Commentators have tended to treat this transitional period as a novelty but history is in fact replete with such systemic transitions sometimes with perilous results Can we predict the future by using the past And if so what might history teach us With *Transition Scenarios* David P Rapkin and William R Thompson identify some predictors for power transitions and take readers through possible scenarios for future relations between China and the United States Each scenario is embedded within a particular theoretical framework inviting readers to consider the assumptions underlying it Despite recent interest in the topic the probability and timing of a power transition and the processes that might bring it about remain woefully unclear Rapkin and Thompson s use of the theoretical tools of international relations to crucial transitions in history helps clarify the current situation and also sheds light on possible future scenarios **Building Common Interests in the Arctic Ocean with Global Inclusion** Paul Arthur Berkman,Alexander N. Vylegzhanin,Oran R. Young,David A. Balton,Ole Rasmus Øvretveit,2022-05-07 This book contains an inclusive compilation of perspectives about the Arctic Ocean with contributions that extend from Indigenous residents and

early career scientists to Foreign Ministers involving perspectives across the spectrum of subnational national international jurisdictions The Arctic Ocean is being transformed with global climate warming into a seasonally ice free sea creating challenges as well as opportunities that operate short to long term underscoring the necessity to make informed decisions across a continuum of urgencies from security to sustainability time scales The Arctic Ocean offers a case study with lessons that are especially profound at this moment when humankind is exposed to a pandemic awakening a common interest in survival across our globally interconnected civilization unlike any period since the Second World War This second volume in the Informed Decisionmaking for Sustainability series reveals that building global inclusion involves common interests to address changes effectively for the benefit of all on Earth across generations
