Smailagic,Thad Starner,2022-06-01 The confluence of decades of computer science and computer engineering research in multimodal interaction e g speech and gesture recognition machine learning e g classification and feature extraction software e g web browsers distributed agents electronics e g energy efficient microprocessors head mounted displays design methodology in user centered design and rapid prototyping have enabled a new class of computers wearable computers The lecture takes the viewpoint of a potential designer or researcher in wearable computing Designing wearable computers requires attention to many different factors because of the computer s closeness to the body and its use while performing

other tasks For the purposes of discussion we have created the UCAMP framework which consists of the following factors user corporal attention manipulation and perception Each of these factors and their importance is described A number of example prototypes developed by the authors as well as by other researchers are used to illustrate these concepts Wearable computers have established their first foothold in several application domains such as vehicle and aircraft maintenance and manufacturing inspection language translation and other areas The lecture continues by describing the next step in the evolution of wearable computers namely context awareness Context aware computing takes into account a user s state and surroundings and the mobile computer modifies its behavior based on this information A user s context can be quite rich consisting of attributes such as physical location physiological state personal history daily behavioral patterns and so forth If a human assistant were given such context he or she would make decisions in a proactive fashion anticipating user needs and acting as a proactive assistant The goal is to enable mobile computers to play an analogous role exploiting context information to significantly reduce demands on human attention Context aware intelligent agents can deliver relevant information when a user needs that information These data make possible many exciting new applications such as augmented reality context aware collaboration and augmented manufacturing The combined studies and research reported in this lecture suggest a number of useful guidelines for designing wearable computing devices Also included with the guidelines is a list of questions that designers should consider when beginning to design a wearable computer The research directions section emphasizes remaining challenges and trends in the areas of user interface modalities of interaction and wearable cognitive augmentation Finally we summarize the most important challenges and conclude with a projection of future directions in wearable computing Table of Contents Introduction The Wearable Computing UCAMP Design Guidelines for Wearable Computing Research Directions Conclusions and Future Challenges **Fun and Games** Panos

Markopoulos, Wijnand IJsselsteijn, Duncan Rowland, 2008-10-08 The use of computing technology for entertainment purposes is not a recent phenomenon Video game consoles home computers and other entertainment media have been used widely for more than three decades and people of all ages are spending an increasing amount of time and money on these technologies More recent is the rise of a vibrant research community focusing on gaming and entertainment applications Driven by the growth and the coming of age of the gaming industry and by its increasing recognition in the media and the minds of the broader public the study of computer games game development and experiences is attracting the interest of researchers from very diverse fields social sciences computing electrical engineering design etc Research of this kind looks to extend the boundaries of gaming technologies In a relentless drive for innovation it looks to create and understand an ever increasing range of experiences and examine how games can provide value for educational therapeutic and other serious purposes These themes were reflected in the call for participation and eventually the papers accepted for presentation The Fun n Games conference was the second event of a bi annual series of conferences The first event of the series was held in Preston in
